Introducing the BD FACSJazz™

Perfectly tuned cell sorting from BD Biosciences.

Breathtaking solo performance.

The BD FACSJazz™ system begins a new era in cell sorting with stellar performance, benchtop fit, and an affordable price.

The BD FACSJazz can be configured with up to 3 lasers and 8 parameters to support your application needs - offloading sorting demand at core labs or meeting the needs of individuals.

Requiring just 2 x 2 ft (61 x 61 cm) of bench space, the BD FACSJazz also addresses biosafety concerns with an optional custom designed biosafety

Helping all people
live healthy lives

cabinet that meets Class II Type A2 NSF 49 and EU 12469 standards.

In addition to factory-optimized settings, the BD FACSJazz comes standard with BD FACS™ Software sorter software to simplify use. This innovative software is specifically designed for cell sorting and features comprehensive control for acquisition, sorting, and analysis.

For legendary results, just add your creativity. Learn how at

Welcome

A WARM WELCOME TO ALL OF YOU!

Dear Glia Community,

On behalf of Network Glia and the organizers, I welcome you all to the XII European Meeting on Glial Cell Function in Health and Disease in Bilbao. The program committee has organized seven excellent plenary lectures and selected 30 symposia reflecting the wide range of topics in the glial field.

This is the second time that this important meeting of the glial community comes to Spain after the one held in Barcelona in 2000. The Glial Meeting series has become a tradition since the first gathering in 1994 at the University of Heidelberg where more than 600 participants got together. Subsequent Glial Meetings have been held throughout Europe every second year and have grown in size to more than 1,000 participants in the last meeting in Berlin. The Bilbao Meeting has received over 650 poster abstracts and the attendance is expected to reach near 1,200 participants from about 45 countries, a new record which reflects the growing interest in glia biology and the vibrant atmosphere surrounding this meeting. The participants, we are happy to say, will also be comprised of the young and growing local community of neuroscientists with an interest in glial cells.

The Glia Meeting 2015 is being held at the Euskalduna Conference Centre, one of the flagships of the new Bilbao, which was designed as a vessel permanently under construction on the site of the former Euskalduna Shipyard. The Euskalduna Centre is very conveniently located at the heart of Bilbao and within walking distance to major hotels, the Guggenheim Museum and the Old Quarter.

Bilbao is the economical capital of the Basque Country, a city that has experienced a tremendous modernization in recent years. It is a lively city that combines tradition with modernity. Famous for its tapa bars and restaurants, the city has become a cultural reference in Southern Europe.

The logistics of the Meeting have been arranged by the professional congress organizers, K.I.T. Group, in association with the non-profit organization Network Glia formed by the previous organizers of the European Glial Meetings. I would like to particularly thank Erik Boddeke, Kris Jessen, Meino Gibson and Helmut Kettenmann for setting this up.

We are very grateful for the generous support of Euskampus, the Basque Government, Achucarro Basque Center for Neuroscience, and IBRO Pan-European Regional Committee (IBRO-PERC) for providing stipends to support the participation of young scientists in the Introductory Course. I also acknowledge the support of Wiley-Blackwell for providing the abstracts as a USB drive as a supplement to GLIA and for providing stipends for young scientists, and the Spanish Society of Neuroscience for supporting several symposia, and all the sponsors and exhibitors.

I hope that you will enjoy the meeting and our city. With your participation I am confident this meeting will be a grand success.

A handwritten signature in black ink, appearing to read "Carlos Matute".

Carlos Matute
Chair Local Organizing Committee

We would like to thank the following sponsors for their support:

GOLD SPONSOR

BRONZE SPONSOR

LOCAL SPONSORS

SPONSORS

Exhibitors

We would like to thank the following exhibitors for their support (alphabetical order, as at June 2015):

Femtonics Ltd.

Booth No. 4

Femtonics Ltd. is a R&D company, operating in the field of two-photon microscopy.

Femtonics focuses on the research and development of laser scanning microscopes for the booming area of (neuro)physiological investigations. Our microscopes are tuned for the fastest, real-time 2D and 3D optical measurements and are especially suited for cutting-edge brain research and pharmaceutical development.

Furthermore, their modular nature ensures that they can be easily adapted to suit other applications, including biophysical use. We can proudly state that our microscopes are widely used all around the globe. Our main strengths from the researchers' point of view are not only our reliability and friendly prices but our unique modular systems built according to our customers' requirements.

www.femtonics.eu

Jackson ImmunoResearch Europe Ltd.

Booth No. 2

supplies First Class Secondary Antibodies and Conjugates.

Our rapid, efficient, direct service extends throughout Europe and includes first-hand technical advice in European time. Our latest products include Alexa Fluor®680 and Alexa Fluor®790 conjugates for Far-red and Infrared detection on Western blots.

www.jireurope.com/home.asp

Leica Microsystems

Booth No. 5

Leica Microsystems develops and manufactures microscopes and scientific instruments for the analysis of microstructures and nanostructures.

Ever since the company started as a family business in the nineteenth century, its instruments have been widely recognized for their optical precision and innovative technology. It is one of the market leaders in compound and stereo microscopy, digital microscopy, confocal laser scanning microscopy with related imaging systems, electron microscopy sample preparation, and surgical microscopes.

Leica Microsystems has seven major plants and product development sites around the world. The company is represented in over 100 countries, has sales and service organizations in 20 countries, and an international network of distribution partners. Its headquarters are located in Wetzlar, Germany.

Miltenyi Biotec GmbH

Booth No. 1

Miltenyi Biotec is a global provider of products and services that advance biomedical research and cellular therapy. Our innovative tools support research at every level, from basic research to translational research to clinical application. Used by scientists and clinicians around the world, our technologies cover techniques of sample preparation, cell isolation, cell sorting, flow cytometry, and cell culture. Our 25 years of expertise spans research areas including immunology, stem cell biology, neuroscience, and cancer. Today, Miltenyi Biotec has more than 1,400 employees in 25 countries – all dedicated to helping researchers and clinicians make a greater impact on science and health.

www.miltenyibiotec.com

THORLABS GmbH

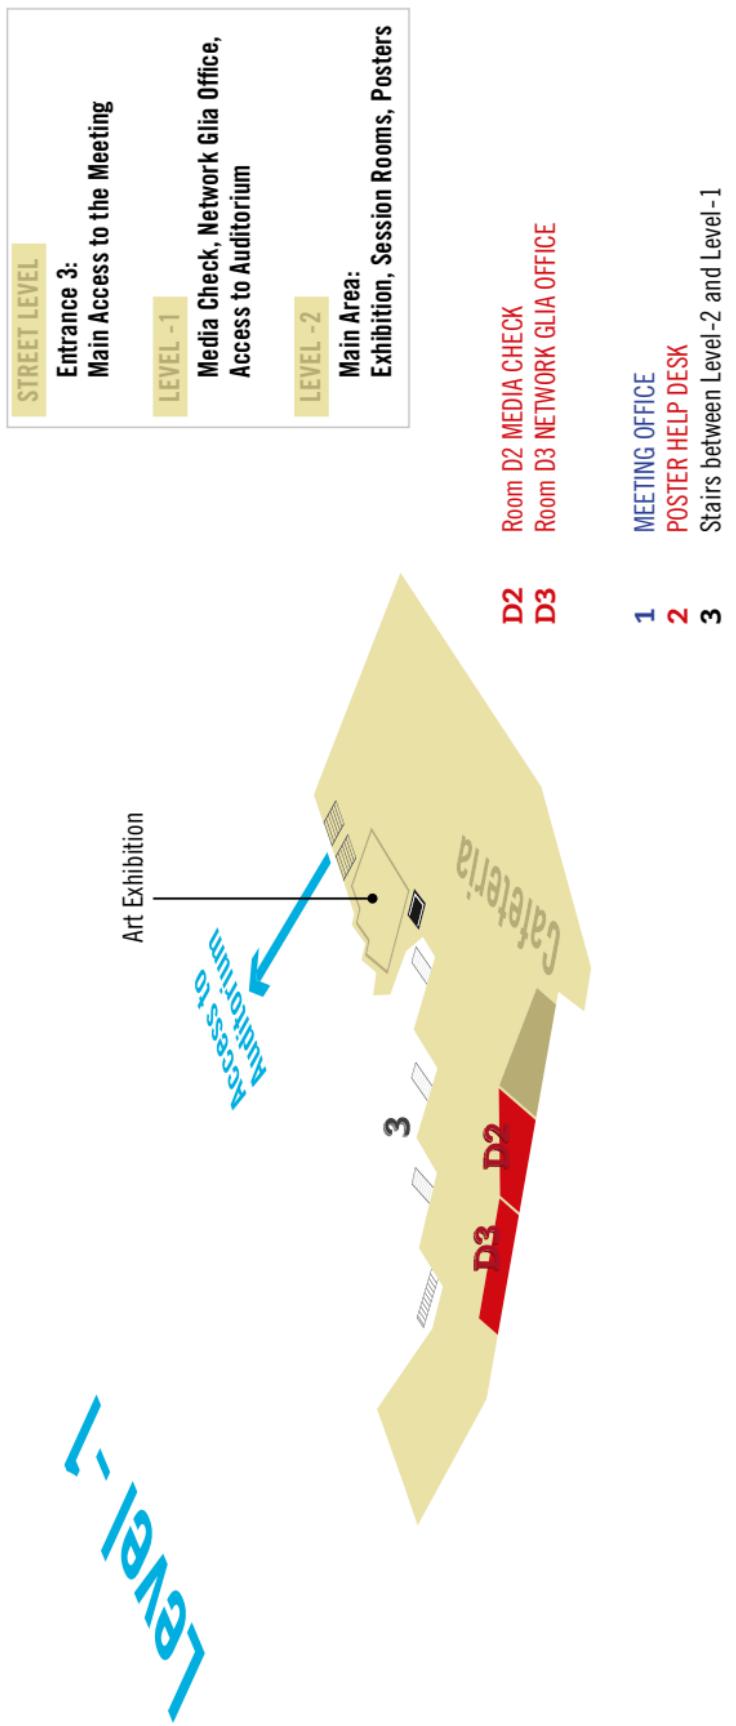

Booth No. 3

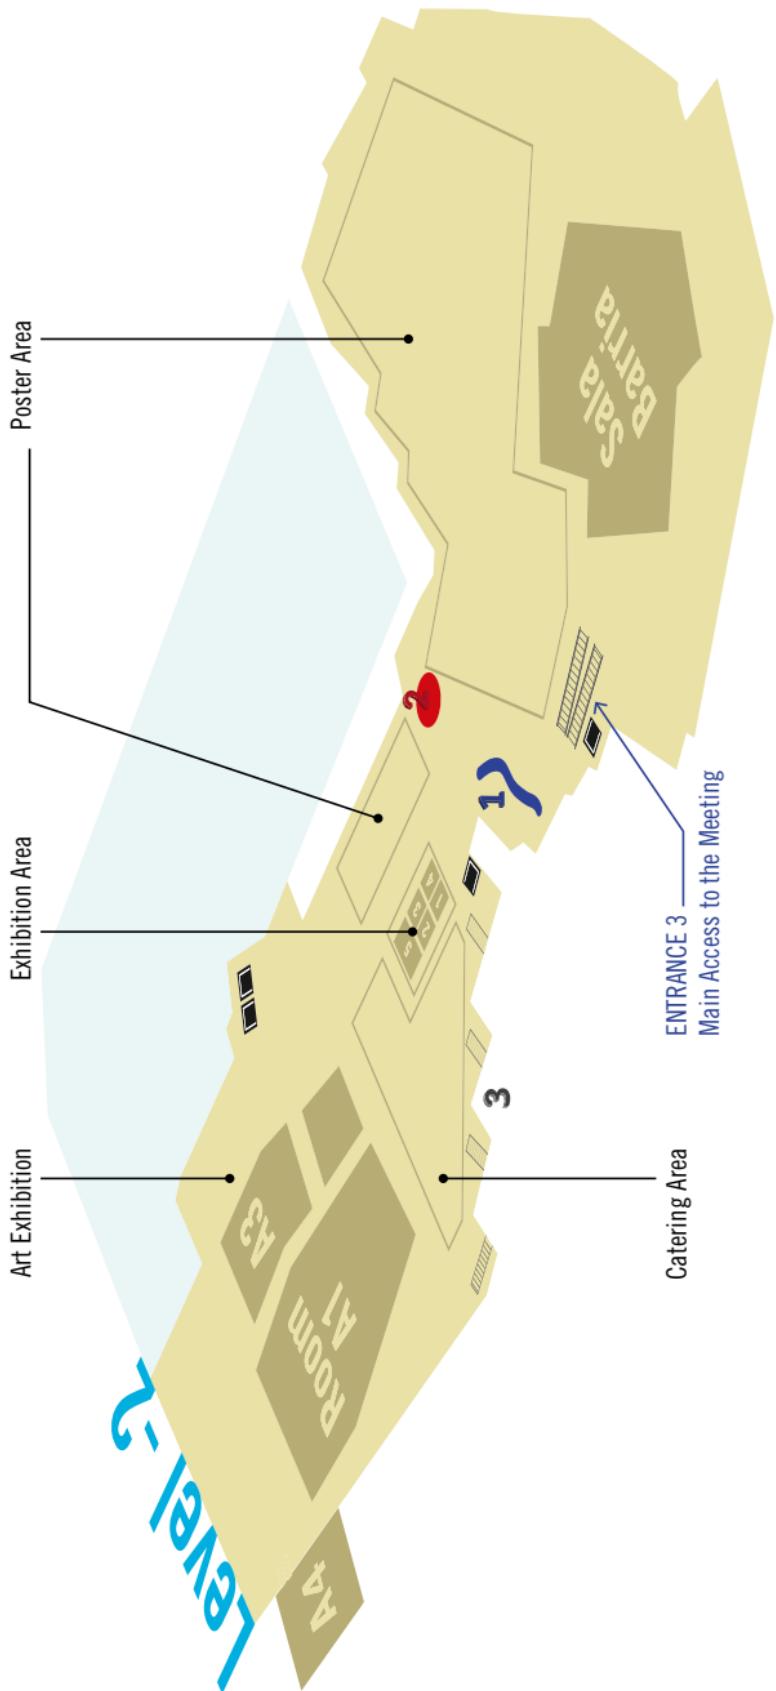

Thorlabs, a vertically integrated photonics products manufacturer, was founded in 1989 to serve the laser and electro-optics research market. As that market has spawned a multitude of technical innovations, Thorlabs has extended its core competencies in an effort to play an ever increasing role serving the Photonics Industry at the research end, as well as the industrial, life science, medical, and defense segments. The organization's highly integrated and diverse manufacturing assets include semiconductor fabrication of Fabry-Perot, DFB, and VCSEL lasers, fiber towers for drawing glass optical fibers (silica, fluoride, tellurite, and hollow core), MBE/MOCVD epitaxial wafer growth reactors, extensive glass and metal fabrication facilities, advanced thin film deposition capabilities, and optomechanical and optoelectronic shops.

General Information

IN ALPHABETIC ORDER

ABSTRACTS

The meeting abstracts will be published in electronic format in GLIA and will be available onsite at the conference on a USB memory stick (free of charge for all registered participants). Additionally they are available via the online itinerary planner at the meeting website.

ART EXHIBITION

In addition to the poster presentation and the industrial exhibition, a “Glia art exhibition” will be displayed during the whole meeting. It will be divided in following sections:

- Cell on Canvas: collection from Carlos Barcia
- Pictures of Glial Cells from members of the Spanish Glial Network
- Glia in Watercolors
- Neurojewels: collection of jewels based on glial morphologies
- Deconstructed neuroscience: collection of jewels made by the students of the Massana Art School based on Neuroscience inspiration
- Glia Ceramic: collection of pottery based on glial cells.

BADGE

Upon registration at the meeting office, attendants will receive a name badge which allows entrance to the meeting. All participants are asked to wear their badge visibly at all times.

The badge gives also delegates free access to the tram network in Bilbao for the entire duration of the conference (starting from Tuesday until Saturday, see “Public transportation and travel” on page 18 for more information).

BILBAO INFORMATION POINT

During the meeting, a tourist information desk will be available at the conference centre, providing interested participants with any kind of information about Bilbao and surroundings.

CERTIFICATE OF ATTENDANCE

Certificates of attendance will be sent to every participant by e-mail after the meeting has taken place.

CREDIT POINTS FOR STUDENTS

Students can collect following ECTS credit points for attending the meeting:

Poster presentation: 1 credit point

Attendance at the Introductory Course: 1/5 credit point

Attendance per day: 1/5 credit point

Attendance at both Introductory Course and meeting: 1 credit point

For the corresponding certificates, please refer to the meeting office.

ELECTRICITY SUPPLY

230 V–50 Hz AC

INSURANCE

The organizers do not take responsibility for individual medical, travel or personal insurance. Participants are advised to carry out their own insurance policies.

INTERNET ACCESS

Wireless internet access is available free of charge throughout the conference venue.

Network Login: GLIA

Password: Bilbao15

LUNCH

Lunch boxes will be served from Thursday to Saturday. Please note that on Wednesday no lunch will be served.

MEDIA CHECK/SPEAKERS' SERVICE

The media check for oral presentations is located in the room D2 (see floor plan on page 12). We kindly ask you to hand in your presentation on a memory stick/CD ROM about 2 hours in advance of your talk, at the latest, or the day before. Please note that using your own laptop will not be possible.

MEETING OFFICE/CLOAKROOM

POSTER SESSIONS

Each poster will hang for two days: Posters with poster number ending of an A will hang on Wednesday and Thursday, posters with poster numbers ending of a B will hang on Friday and Saturday.

The presenting author of each poster is requested to be present at her/his poster during the poster session. The poster sessions are divided into even and uneven serial numbers. Each poster is presented in two sessions of 60 min.

Posters with numbers ending with A:

(Hanging of posters: Wednesday, July 15, before 10:00)

Wednesday, July 15, 2015 17:15–18:15 and
Thursday, July 16, 2015 13:15–14:15
—Uneven serial numbers (e.g. T03-**03A**)

Wednesday, July 15, 2015 18:15–19:15 and
Thursday, July 16, 2015 14:15–15:15
—Even serial numbers (e.g. T03-**04A**)

All posters must be removed on Thursday, July 16 until 16:00.

Posters with numbers ending with B:

(Hanging of posters: Thursday, July 16, from 17:00/Friday, July 17, before 10:00)

Friday, July 17, 2015 13:15–14:15 and
Saturday, July 18, 2015 13:00–14:00
—Uneven serial numbers (e.g. T03-**03B**)

Friday, July 17, 2015 14:15–15:15 and
Saturday, July 18, 2015 14:00–15:00
—Even serial numbers (e.g. T03-**04B**)

All posters must be removed on Saturday, July 18 directly after the poster session.

The size of a poster is DIN A0 landscape format (85 cm height, 119 cm width). Appropriate adhesive material to hang your poster will be available at the poster help desk.

PUBLIC TRANSPORTATION AND TRAVEL

How to reach the city center/venue from Bilbao airport

The Bilbao airport is located about 12 km away from the city. A simple and cheap way to get to and from the centre of Bilbao from the airport is to take the shuttle bus Bizkaibus A3247. The stop is located just outside of the arrival hall.

The bus runs throughout the day and takes about 20 minutes to get into the city. The nearest stop to the Euskalduna Conference Centre is the stop “Gran Via 79”. Cost for a single ticket: €1.45

Taxis generally take about 20–25 minutes and cost up to €30 per ride. There is a taxi stand outside of the arrival hall at Bilbao Airport.

Free access to the tram network of Bilbao:

From Tuesday, July 14 to Saturday, July 18 all registered participants will have free and unlimited tram access within the city. Please make sure to wear your badge while entering the tram. The tram is operated by the company Euskotren and connects the Euskalduna Conference Centre with the old town quickly and easily.

Please note that the free access is only valid for the tram. If you want to take the metro or the bus, you have to buy a transport ticket.

REGISTRATION

On-site registration will be available on all conference days, registration fees can be paid in cash or by VISA, Mastercard or American Express.

Full registration (all days):

Scientists:	€550
Students, PhD Students:	€350
Commercials:	€595
Introductory Course on Glial Biology:	€30.00 (Students) / €65.00 (Scientists)

Registration per day:

Scientists:	€170
Students, PhD Students:	€120
Commercials:	€230

Students must show their valid student card!

Registration fee includes

- Admission to all sessions, poster area and exhibition
- Lunch boxes from Thursday to Saturday
- Informal get-together with free drinks on Wednesday evening
- Conference bag including program booklet, abstract USB stick, city map and sponsor materials
- Free access to all trams in Bilbao from Tuesday to Saturday

TAXI

The following taxi companies offer a 24-hour service in Bilbao, including airport transfers:

Radio Taxi Bilbao,	Tel. +34 94 444 88 88
Radio Teletaxi,	Tel. +34 94 410 21 21

Choose *GLIA* for your research

Edited by **Bruce R. Ransom** and **Helmut Kettenmann**

Advantages of Publishing in *GLIA*

Reaching a Multidisciplinary Audience of Dedicated Biomedical Researchers. *GLIA*, the journal that launched the field of glial research, is still the journal of choice for neuroscientists, neurobiologists, neurologists, cell and developmental biologists, anatomists, pathologists, and neurochemists, looking for the most comprehensive coverage in this field of study.

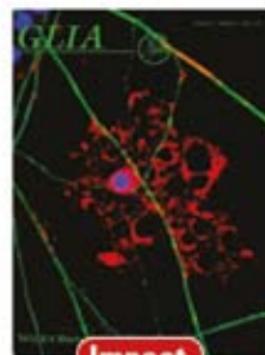

Securing Rapid Online Publication through EarlyView®. Your article will be posted online as soon as it is ready, before the release of the compiled print issue.

Accessing a State-of-the-Art Submission System. *GLIA* offers online manuscript submission and peer-review via ScholarOne Manuscripts (formerly known as Manuscript Central), a user-friendly system making manuscript submission and tracking quick, easy, and safe.

Attaining High Visibility. *GLIA* is available online through Wiley Online Library®, Wiley's Internet publishing platform. Wiley Online Library® has more than 29 million user sessions per year.

Open Access Publishing Available. OnlineOpen® allows authors or funders to pay a fee to make their articles freely available and compliant with government mandates.

Joining into an Intellectual Partnership with Wiley. Publishing at Wiley is truly a collaborative process. We value the long-term relationships we have with our authors and we are committed to maintaining the standard of excellence that has been essential to Wiley's success for nearly two centuries.

IKERBASQUE

Ikerbasque, the Basque Foundation for Science, is the institution dedicated to fostering the production, promotion and dissemination of scientific knowledge in the Basque Country.

Among other activities, Ikerbasque currently runs different programmes to attract and retain talented researchers, in different career stages, and in all the fields of knowledge. Recruited scientists are appointed to the different Basque research institutions including universities, fundamental research centres, cooperative research centres and technology centres.

International senior and postdoctoral researchers willing to join the Achucarro centre or other neuroscience related institutions in the Basque Country are welcome to apply for any of our open calls.

For more information: www.ikerbasque.net

BIZKAIA TALENT

Bizkaia Talent is the agency supported by the Government of Bizkaia (established in 2005) with the mission of strengthening the conditions for attracting, connecting and retaining talented professionals in the Basque territory of Biscay (Bizkaia).

Bizkaia Talent seeks to promote and improve the most important factor in the development of any region: human resources. In so doing, it takes action to attract talent with the help of the leading companies and universities in the Basque Country.

Bizkaia Talent offers essential services for professionals and their families willing to start a career and life in the Basque Country, from support in housing and education, to leisure and personal and professional networking.

Join the network of professionals of Bizkaia Talent: Be Basque Network, because you can also be Basque!

For more information: www.bizkaiatalent.org | www.bebasquetalentnetwork.org

16:00**Departure**

Network Glia e.V. was founded in 2011 with the goal of enhancing public awareness and scientific exchange on glial cells.

Network Glia

The association has two major activities:

1. The WEBSITE offers material both for the general public such as

- an introduction to glial cells and for glial researchers
- a list of animal models for glia research
- an online library with classic glia papers
- a list of scientific networks in glial research

2. Organizing the EUROPEAN MEETINGS ON GLIAL CELL FUNCTION IN HEALTH AND DISEASE.

Network Glia e.V.

Max Delbrück Centrum für Molekulare Medizin (MDC) Berlin-Buch
Robert-Rössle-Str. 10, 13125 Berlin, Germany
Tel.: +49 30 9406 3336, Email: gibson@mdc-berlin.de

A fluorescence micrograph showing a dense network of glial cells. The cells are stained blue, and some specific structures or markers are highlighted in green. The image serves as a visual representation of the type of research mentioned in the text.

POSTER SESSION I

Wednesday, July 15
Thursday, July 16

17:15–19:15
13:15–15:15

POSTER SESSION II

Friday, July 17
Saturday, July 18

13:15–15:15
13:00–15:00

Explanation of Abstract Numbers

TYPE OF PRESENTATION

P = Plenary Lecture
S = Symposium
W = Workshop
I = Introductory Course
T = Poster

DAY OF POSTER PRESENTATION

A WED & THU
Poster Session I

B FRI & SAT
Poster Session II

NUMBER OF THE POSTER TOPIC

SERIAL NUMBER

There is one poster session per day: poster session I on Wednesday and Thursday, poster session II on Friday and Saturday. Posters with poster numbers ending with an A are displayed on Wednesday and Thursday (= poster session I), posters with a poster number ending with a B are displayed on Friday and Saturday (= poster session II). So every poster will be discussed during two days.

Each poster session (120 min) is divided into two parts (each 60 min): uneven and even serial numbers. In the first part of a session of a day posters with uneven serial numbers will be discussed (e.g. T12-03B). In the second 60 min of a session posters with even serial numbers will be discussed (e.g. T12-02B).

Posters should be mounted on the first day of presentation until 10:00 and are supposed to remain displayed during the whole poster session (two days). They must be removed until 16:00 on Thursday (Poster Session I) and directly after the poster session on Saturday (Poster Session II).

Poster Topics

- T01** Cell migration
- T02** Cell proliferation, lineages and differentiation
- T03** Cell signaling
- T04** Cytoskeleton
- T05** Degenerative disease, toxicity and neuroprotection
- T06** Extracellular matrix and cell adhesion molecules
- T07** Gene expression and transcription factors
- T08** Glial-neuronal interactions
- T09** Ischemia and hypoxia
- T10** Myelin
- T11** Neural stem/progenitor cells
- T12** Neuroimmunology and neuroinflammation
- T13** Neurovascular interactions
- T14** Regeneration and repair
- T15** Transmitter receptors, ion channels and gap junctions
- T16** Trophic factors
- T17** Tumours

Poster Session I

Wednesday, July 15	17:15–19:15
Thursday, July 16	13:15–15:15

T01 CELL MIGRATION

T01-01A

PAR-3 and Syndecan-4 are involved in astrocyte adhesion induced by neuronal Thy-1

A. Cárdenas, M. Kong, A. Alvarez, A. Valdivia, A. F. Quest, L. Leyton

T01-02A

Two-Photon polymerized microstructures for guiding cell growth in neuron and astrocyte co-cultures

T. Joki, S. Turunen, M. Kellomäki, S. Narkilahti

T01-03A

Gs protein coupled receptor signalling strongly represses PI3K γ -driven microglial migration

N. Schneble, C. Schmidt, R. Bauer, J. Müller, R. Wetzker

T01-04A

Water fluxes and aquaporins in migrating oligodendrocyte progenitor cells

D. Thatenhorst, C. von Bassewitz, P. Happel, I. D. Dietzel

T02 CELL PROLIFERATION, LINEAGES AND DIFFERENTIATION

T02-01A

Dissecting the role of Etv5 in oligodendrocyte development in the neocortex

L. Adnani, A. Balakrishnan, S. Li, J. Chan, C. Schuurmans

T02-02A

Evidence for oligodendrocyte dedifferentiation and subsequent formation of astrocytes after acute brain injury

X. Bai, N. Zhao, W. Huang, A. Cupido, R. Zhao, J. Hirrlinger, W. Walz, F. Kirchhoff, A. Scheller

T02-03A**Clonal distribution pattern reveals glial heterogeneity**A. Bribian, M. Figueres-Oñate, L. Lopez-Mascaraque

T02-04A**Origin and generation of different astroglial phenotypes in the cerebellum**V. Cerrato, E. Parmigiani, K. Leto, E. Fucà, M. Figueres-Oñate,
L. López-Mascaraque, A. Buffo

T02-05A**Regulatory T cells enhance oligodendrocyte differentiation in vitro**M. Dittmer, T. O'Hagan, P. Bankhead, R. Medina, Y. Dombrowski, D. Fitzgerald

T02-06A**Peptidylarginine deiminases as regulators of the epigenetic state of oligodendrocyte precursor cells**A. Falcao, S. Marques, M. Varas, M. L. Nielsen, G. Castelo-Branco

T02-07A**Clathrin-mediated endocytosis is critical for Schwann cell myelination**M. Ghidinelli, E. Tinelli, U. Suter

T02-08A**A novel automated dissociation procedure allows efficient immunomagnetic isolation of astrocytes, oligodendrocytes, and neurons from adult rodent brain tissue**M. Jungblut, S. Reiß, A. Bosio

T02-09A**Self-renewal capacity of reactive astrocytes in vivo**L. Lange Canhos, S. Sirko, M. Götz

T02-10A**Exogenous FGF-1 hault differentiation of NKX2.2+pre- OPC to NG2+ OPC in a rat spinal cord transection model**M.-J. Lee, C. J. Chen, W.-C. Chang, H. Cheng

T02-11A**DMT1 is expressed and required for adequate maturation in oligodendrocytes**L. Marziali, V. Cheli, V. Spreuer, J. Pasquini, P. Paez

T02-12A

NG2 and S100B co-localization in the developing mouse hippocampus

B. Moshrefi-Ravasdjani, P. Dublin, K. W. Kafitz, G. Seifert, C. Steinhäuser, C. R. Rose

T02-13A

Role of microRNAs miR-124 and miR-137 in directing neuronal reprogramming of astrocytes

E. Papadimitriou, P. Koutsoudaki, K. Aravantinou-Fatorou, D. Thomaidou

T02-14A

Oligodendrocyte maturation through gestational iron deprivation

V. Rosato Siri, M. E. Guitart, J. M. Pasquini

T02-15A

Ependymal cilia polarization and IIIG9 expression is a synchronous process

K. Salazar, V. Baeza, F. Martínez, F. Nualart, M. Cifuentes

T02-16A

Postnatal hyperoxia affects OPC and GCP proliferation

T. Scheuer, V. Brockmöller, K. Marggraf, C. Bührer, S. Endesfelder, T. Schmitz

T02-17A

Umbilical cord blood stem cells-derived microglia

K. Takahashi, H. Yamazaki, M. Yamada

T02-18A

SNX27 regulation of GPR17 recycling is important for the correct differentiation of oligodendrocytes

A. F. Ulivi, V. Meraviglia, A. Fratangeli, F. Valenza, D. Lecca, M. P. Abbracchio, P. Rosa

T02-19A

Role of Ascl1 in NG2 cells in the embryonic and adult spinal cord

T. Y. Vue, D. Kelenis, J. Johnson

T02-20A

Dynamic regulation of Olig2 expression in oligodendrocyte differentiation

M. Yamada, I. Imayoshi

T02-21A

Ex-vivo analysis of astrocyte subpopulations

C. Grit, I. D. Vainchtein, N. Brouwer, B. J. L. Eggen, H. W. G. Boddeke

T02-22A**OPC heterogeneity in the optic nerve**

S. Förster, A. Crawford, P. Van Wijngaarden, R. Tripathi, W. Richardson,
R. Franklin

T03 CELL SIGNALING

T03-01A**Activated Microglia/Macrophage Whey Acidic Protein (AMWAP) inhibits NF κ B signaling and induces a neuro-protective phenotype in microglia**

A. Aslanidis, M. Karlstetter, R. Scholz, S. Fausser, C. Fried, H. Neumann,
M. Pietsch, T. Langmann

T03-02A**Prenatal stress alters microglial and inhibitory neuron development in an animal model of infantile spasms**

H. Baek, M.-H. Yi, E. Zhang, S. Kim, N. Shin, J. W. Kang, D. W. Kim

T03-03A**Involvement of transcription factors NF- κ B, AP-1 and STAT-3 in death of crayfish glial and neuronal cells induced by photodynamic impact**

E. Berezhnaya, M. Neginskaya, S. Sharifulina, V. Kovaleva, A. Uzdensky

T03-04A**Growth differentiation factor 15 (GDF15) expression in astrocytes after excitotoxic lesion in the mouse hippocampus**

S. Kim, M.-H. Yi, E. Zhang, H. Baek, N. Shin, S.-H. Oh, D. W. Kim

T03-05A**Calcium-induced calcium release and gap junctions mediate large-scale calcium waves in olfactory ensheathing cells *in situ***

M. Stavermann, P. Meuth, M. Doengi, A. Thyssen, J. W. Deitmer, C. Lohr

T03-06A**Protein Tyrosine Phosphatase Alpha (PTPa)-mediated Akt activation is required for oligodendrocyte differentiation and myelination**

P. Ly, Y. Shih, J. Wang, C. Pallen

T03-07A**An interactive model of astrocyte in 3D geometry**

L. Savchenko, C. Henneberger, L. Bard, I. Kraev, N. Medvedev, M. Stewart, D. Rusakov

T03-08A

The role of DNA methylation and histone deacetylation in reactions of glial cells to photodynamic treatment

S. Sharifulina, M. Komandirov, A. Uzdensky

T03-09A

Astrocytic expression of CTMP following an excitotoxic lesion in the mouse hippocampus

N. Shin, M.-H. Yi, E. Zhang, S. Kim, H. Baek, S. Lee, D. Kim

T03-11A

Effect of long-term culture on telomere length and telomerase activity in murine brain microglia

M. Stojiljkovic, Q. Ain, T. Bondeva, O. Witte, C. Schmeer

T03-12A

P2X₇ receptor stimulation in the presence or absence of calcium leads to antagonistic signaling pathways activation in neurons

B. Urzelai, F. Llavero, A. Artaso, J. Zugaza

[▼ Differential Gene Expression Analysis](#)

[▼ Quantitative Gene Expression Analysis](#)

The Glia Open Access Database (GOAD) is a comprehensive web-based tool to access and analyze glia transcriptome data. The tool has several features: 1) Differential gene Expression (DE) Analysis, 2) Quantitative gene Expression (QE) analysis and 3) a search utility where gene expression data can be searched based on gene accession numbers or gene symbols. These three features can be accessed using a drop-down menu on the home page:

www.goad.education

More information regarding the GOAD tool, expression profiling, and contact information can be found in Holtman et al., which appeared in the March 25th, 2015 issue of *Glia*, doi: 10.1002/glia.22810.

Comments, suggestions, and likes can be left at:

C. Katanov, E. Peles

T10-11A

MicroRNA miR-145-5p represents a novel MS therapeutic target through its regulation of critical myelination regulator MYRF

S. Kornfeld, R. Kothary

T10-12A

Investigating the mechanistic basis of cholesterol-mediated myelination

E. Mathews, B. Appel

T10-13A

Investigation of myelin maintenance and turnover by inducible MBP knock-out in adult mice

W. Möbius, M. Meschkat, K. Kusch, H. Werner, K.-A. Nave

T10-14A

Characterization of DUSP15/VHY as a regulatory target of Sox10 and Myrf

K. N. Muth, M. Küspert, E. Sock, M. Wegner

T10-15A

Role of Jun activating binding protein 1 (Jab1) in Central Nervous System (CNS) myelination

C. Rivellini, E. Porrello, G. Dina, K.-A. Nave, C. Lappe-Siefke, U. Suter, R. Pardi, A. Quattrini, S. C. Previtali

T10-16A

Analysing the role of Sox2 in regulating Schwann cell myelination during development and after injury

S. Roberts, X. P. Dunn, R. Doddrell, D. Parkinson

T10-17A

In vivo pathogenesis of demyelination in an animal model of multiple sclerosis

E. Romanelli, S. Potz, D. Merkler, M. Weber, D. Bishop, T. Misgeld, M. Kerschensteiner

T10-18A Poster retracted

T10-19A

Cystine/glutamate antiporter is essential for oligodendrocyte survival and its blockage exacerbates experimental autoimmune encephalomyelitis

F. Soria, O. Pampliega, J. C. Chara, A. Pérez-Samartín, H. Sato, C. Matute, M. Domercq

T10-20A

CNS Myelin sheath is stochastically built by homotypic fusion of myelin membranes within the bounds of an oligodendrocyte process

S. Szuchet, L. Nielsen, M. Domowicz, J. Austin II, D. Arvanitis

T10-21A

Role of Ire1/Xbp-1 pathway in S63del neuropathy

T. Touvier, C. Ferri, L. Glimcher, M. L. Feltri, L. Wrabetz, M. D'Antonio

T10-22A

Oligodendrocyte death in DTA mice results in late-onset immune-mediated CNS demyelination

M. Traka, J. Podojil, D. McCarthy, S. Miller, B. Popko

T10-23A

Role of Schwann Cell in regulation of myelin sheath properties during nerve fiber excitation and activation of purinergic receptors

E. Verdiyan, E. Bibineyshvili, N. Kutuzov, G. Maksimov

T10-24A

Impaired motor learning as the result of myelin disruption

H. Wake

T10-25A

Cdon, a cell surface protein, mediates oligodendrocyte differentiation and myelination

L.- C. Wang, G. Almazan

T10-26A

Molecular mechanism of myelin disassembly

M.- T. Weil, W. Möbius, T. Ruhwedel, S. Frey, P. Kursula, A. Winkler, C. Stadelmann-Nessler, E. Romanelli, M. Kerschensteiner, M. Simons

T10-27A

Distinct modulation of myelination efficiency by cortical and non-cortical astrocytes

I. Werkman, D. Hoekstra, W. Baron

T10-28A

Extreme longevity of myelinating oligodendrocytes in mouse

R. Tripathi, W. Richardson

T11 NEURAL STEM/PROGENITOR CELLS

T11-01A

Molecular and ultrastructural alterations of the neural stem cells from dystrophic mdx mouse

T. Annese, P. Corsi, S. Ruggieri, R. Tamma, S. Picocci, C. Marinaccio, A. De Luca, D. Ribatti, B. Nico

T11-02A

Mitochondrial dysfunction mimics the impact of ageing on hippocampal neurogenesis

R. Beckervordersandforth, B. Ebert, K. Steib, I. Schäffner, S. Keiner, C. Redecker, S. Schuster, V. Eulenburg, N. Toni, J. Moss, J. von Wittgenstein, N.-G. Larsson, M. Götz, J. Schlachetzki, R. Jagasia, C. D. Lie

T11-03A

Activation of Adenosine A1 Receptor shifts neural stem cells fate from neurogenesis to astrogliogenesis

M. Benito, C. Matute, F. Cavaliere

T11-04A

Implementation of the stem cell properties of NG2+ cells: focus on the epigenetic modulator VPA and the purinergic receptor GPR17

M. Boccuzzi, S. Ceruti, M. P. Abbracchio

T11-05A

Emx2 expression levels in NSCs modulate astrogenesis rates by regulating Egfr and Fgf9

C. Falcone, C. Filippis, M. Granzotto, A. Mallamaci

T11-06A

Activation of NFAT transcription factors in neural precursor cells induces astrocyte and neuron differentiation

M. Fernandez, M. C. Serrano-Pérez, F. Neira, M. Berjón-Otero, S. Mellado, E. Doncel-Pérez, E. Cano, P. Tranque

T11-07A

The ependymal region of the adult human spinal cord differs from other species and shows ependymoma-like features

D. Garcia-Ovejero, A. Arevalo-Martin, B. Paniagua-Torija, J. Florensa-Vila, I. Ferrer, L. Grassner, E. Molina-Holgado

T11-09A

Foxg1 antagonizes cortico-cerebral astrogenesis

C. Grudina, C. Falcone, N. Blecich, A. Mallamaci

T11-10A

Neurotransmitter and neurotrophin receptor expression by human dental pulp stem cells: implications for neural differentiation

J. Luzuriaga, V. Uribe-Etxebarria, C. Gomis, P. Chamero, A. Villarroel, F. Unda, G. Ibarretxe

T11-11A

Aged neural stem cells in the hippocampus

S. Martín Suárez, R. Valcárcel Martín, J.M. Encinas Pérez

T11-12A

The HS-modifying enzyme Sulf2 controls generation of a novel glial precursor cell sub-type in the ventral spinal cord

D. Ohayon, N. Escalas, P. Cochard, B. Glise, C. Danesin, C. Soula

T11-13A

Region-specific differences in astrocyte plasticity in the mouse forebrain

S. Ohlig, S. Sirk, M. Götz

T11-14A

Do umbilical cord stem cells direct neural progenitor cells towards an oligodendroglial fate through paracrine factors or cell-to-cell contact?

B. Oppliger, M. Jörger-Messerli, U. Reinhart, D.V. Surbek, A. Schoeberlein

T11-15A

Compensatory mechanisms in the age-induced decline of adult hippocampal neurogenesis

S. Beccari, S. Martín-Suárez, J.M. Encinas, A. Sierra

T11-16A

Towards mobilizing the brain's own neural stem cells to restore striatal dysfunction in Parkinson patients

M. van Strien, J. Sluijs, E. Hol

T12 NEUROIMMUNOLOGY AND NEUROINFLAMMATION

T12-01A

Intravenous immunoglobulin protects oligodendrocytes in an organotypic slice culture model for demyelination

C. Baksmeier, M. Winter, J. Steckel, M. Harrer-Kuster, N. Goebels, H.-P. Hartung

T12-02A

Age-related changes in glial functionality in hippocampal astrocytes: the role of NF κ B, p38, Nrf-2 and HO-1 pathways in inflammatory response

B. Bellaver, D. Guerini de Souza, D. Gomes de Souza, A. Quincozes-Santos

T12-03A

Translational investigation of microglia and antipsychotic medication

P. Bloomfield, S. Selvaraj, I. Bonoldi, M. Veronese, D. Owen, N. Kalk, M. Bloomfield, F. Turkheimer, P. McGuire, V. de Paola, O. Howes

T12-04A

Green tea extract decreases astrogliosis and oxidative stress in the frontal cortex of obese rats

E. Bondan, R. D. C. Macedo Dos Santos, R. Otton

T12-05A

IL-4 induces an acute pro-inflammatory burst and activates an alternative gene program mediated by the JAK1/JAK3/STAT6 pathway in microglia

E. Bonfill, M. Dabrowski, B. Kaminska, A. M. Planas

T12-06A

Early neuroinflammation biomarkers in the Experimental Allergic Encephalomyelitis (EAE), an animal model for Multiple Sclerosis

N. Borjini, M. Fernandez, L. Giardino, L. Calzà

T12-07A

Microimmunotherapeutic administration of cytokines improve the clinical symptoms in EAE, an animal model of multiple sclerosis

A. Camps Puig, B. Almolda, B. Castellano, B. González

T12-09A

Altered immune signaling (TLR4 deficiency) impairs oligodendrocyte lineage cell responses and functional recovery after spinal cord injury in mice

J. Church, P. Popovich, D. McTigue

T12-10A

FTY720 attenuates excitotoxicity and neuroinflammation

R. Cipriani, J. C. Chara, A. Rodríguez-Antigüedad, C. Matute

T12-11A

The abundance of myeloid-derived suppressor cells protects against myelin damage in EAE

D. Clemente, C. Melero-Jerez, F. de Castro

T12-12A

SK channels modulate alpha-synuclein-dependent microglial activity and mitochondrial metabolism

A. Dolga, L. Matschke, F. Wilhelmy, M. Gold, R. Dodel, N. Decher, C. Culmsee

T12-13A

Differentially activated microglia release Extracellular Vesicles (EVs) presenting specific contents and functions in a model of nerve repair

F. Drago, T. Arab, C. Van Camp, F. Le Marrec-Croq, J. Franck, J.-P. Gimeno, M. Salzet, P.-E. Sautiere, C. Lefebvre, J. Vizioli

T12-14A

Profiling glial CXCL12 receptor expression during experimental autoimmune encephalomyelitis

J. Engele, F. Pelkner, A. Flügel, M. Puchert

T12-15A

Activation of the alternative (RelB-dependent) NF- κ B pathway in microglia is required for brain inflammation in experimental autoimmune encephalomyelitis

C. Engelmann, R. Wilke, R. Grimalowski, M. Riemann, F. Weih, R. Haenold

T12-16A

Sulforaphane exerts protective effects in microglial cells by switching polarization phenotypes

E. Eren, K. U. Tufekci, K. B. Isci, S. Genc

T12-17A

The role of microglial P2Y12 in controlling neurotrophic virus infection in the brain

R. Fekete, B. Sperlágh, I. Kittel, Z. Boldogkői, Z. Környei, I. Dénes

T12-18A

High fat diet effects on brain inflammatory mechanisms and hypothalamic progenitor cells

L. Fernandez de Cossio Gomez, J. Kim, Q. Leyrolle, A. Nadjar, S. Laye, G. Luheshi

T12-19A

DNGR-1+ dendritic cells are located in meningeal and choroid plexus membranes of the non-injured brain

A. Fernández Gil, E. Quintana, P. Velasco, B. de Andres, I. Liste, D. Sancho, M. Gaspar, E. M. Cano López

T12-20A

Chronic cortical inflammation as a novel experimental model of progressive Multiple Sclerosis. Influence of the innate immune system

C. Ferrari, B. Silva, M. C. Leal, M. I. Farias, V. Cavaliere Candedo, F. Pitossi

T12-21A

Effect of an omega-3/antioxidants supplemented diet on emotional and cognitive alterations and neuroinflammatory processes associated with obesity

C. Fourrier, J. Sauvant, A. Aubert, S. Layé, C. Joffre, N. Castanon

T12-22A

Characterization of inflammatory response after mouse spinal cord injury

I. Francos-Quijorna, R. López-Vales

T12-23A

CX3CR1 deletion restricts inflammatory signaling in microglia and promotes axon sprouting and synapse preservation after spinal cord injury

C. Frerja, J. Hall, D. McTigue, P. Popovich

T12-24A

CD14 control over microglial TLR4 functions involves an IFN β -mediated feedback mechanism

C. Fritzsche, H. Janova, U.-K. Hanisch

T12-25A

A phosphorous-based dendrimer with anti-inflammatory properties towards microglia

S. Fruchon, A.-M. Caminade, C. Turrin, R. Poupot

T12-26A

Microglia tolerance to LPS is mediated by RelB-dependent epigenetic silencing

X. Zhang, W. Schaafsma, E. Boddeke, B. Eggen

T12-27A

Autoantibody-driven astrocytopathy: creation of an *in vivo* model to decipher the pathophysiological mechanisms of Neuromyelitis optica

P. Giraudon, A. Ruiz, S. Cavagna, C. Watrin, S. Parrot, G. Malleret, C. Benetollo, N. Auvergnon, S. Vukusic, R. Marignier

T12-28A

Modulation of the glial niche by the neuropeptide Cortistatin: involvement in neuroinflammation and neurodegeneration

E. Gonzalez-Rey, M. Pedreño, M. Caro, I. Forte, G. Robledo, J. M. Villaescusa, M. Delgado

T12-29A

Culturing adult mouse microglia

A. Greenhalgh, K. Renault, B. McColl, S. David

T12-30A

Ccr2 deletion dissociates cavity size and Tau pathology after mild traumatic brain injury

S. Gyoneva, D. Kim, A. Katsumoto, B. Lamb, R. Ransohoff

T12-31A

Differential balance in STAT1 and STAT3 activation and transcriptional responses to gp130 cytokines in astrocytes versus microglia

M.-P. Hsu, S. Rose-John, I. L. Campbell

T12-32A

Functional analysis of TN-C and GFAP induced upregulation in the reactive astrocytes in the injured brain and in primary culture

H. Ikeshima-Kataoka, S. Inui, M. Imamura, M. Yasui

T12-33A

CD11c-positive cells from brain, spleen, lung, and liver exhibit site-specific immune phenotypes

K. Immig, M. Gericke, F. Menzel, F. Merz, M. Krueger, F. Schieffenhövel,
U.K. Hanisch, K. Biber, I. Bechmann

T12-34A

Sulforaphane inhibits inflammasome activation in murine microglial cells

K. Isci, E. Eren, Ü Genç

T12-35A

The role of autophagy in microglial activation

M. Jendrach, F.L. Heppner

T12-36A

RNA-based regulation of neuroinflammatory responses

I. Jou

T12-37A

Interferon-beta induced within the CNS plays a protective role in EAE

R. M. H. Khorooshi, M. Thorsen Mørch, T. Hellesøe Holm, C. Tue Berg, R. Truong Dieu, D. Dræby, S. Weiss, S. Lienenklaus, T. Owens

T12-38A

The role of NG2 in inflammatory disease of the CNS

M. Kitic, K. Karram, N. Israel, F. Wanke, F.C. Kurschus, A. Waisman

T12-39A

Targeting the CSF-1 receptor alleviates two forms of Charcot-Marie-Tooth disease in mice

D. Klein, † Patzkó, D. Schreiber, A. van Hauwermeiren, M. Baier, J. Groh, B. L. West, R. Martini

T12-40A

Augmentation of neuropathic pain by DAP12 mediated signal in microglia

H. Konishi, M. Kobayashi, T. Takai, H. Kiyama

T12-41A

Local inflammatory cell infiltration in marmosets with experimental autoimmune encephalomyelitis is associated with retinal ganglion cell activation and subpial cortical demyelination

N. Kramann, K. Neid, M. L. Ton, E. Fuchs, W. Brück, C. Wegner

T12-42A

Toll-like receptor 3 contributes to inflammatory Schwann cell activation and Wallerian degeneration after peripheral nerve injury

H. Lee, J. Baek, S.J. Lee

T12-43A

Developmental priming of microglia by n-3 PUFAs deficiency

Q. Leyrolle, C. Lacabanne, V. Labrousse, A. Seré, A. Aubert, C. Joffre, S. Layé, A. Nadjar

T12-44A

IGF1R signaling in oligodendrocytes regulates neuroinflammation without affecting cell survival

G. Locatelli, M. Krueger, B. Ingold-Heppner, O. Prazeres da Costa, L. Koch, A. Dolga, M. Huber, M. Gold, J. Brüning, C. Culmsee, A. Waisman, I. Bechmann, B. Becher, T. Buch

T12-45A

Inducible nitric oxide synthase (NOS2) modulation after chronic minocycline in neuropathic pain and influence of selective NOS2 inhibitor on opioid analgesia

W. Makuch, E. Rojewska, M. Zychowska, B. Przewłocka, J. Mika

T12-46A

Novel approaches to image the neuroinflammatory response after stroke by PET

A. Martin, V. Gómez-Vallejo, B. Szczupak, A. Arrieta, A. Cano, C. Muñoz, D. Padro, A. Damont, F. Dolle, J. Llop

T12-47A Poster retracted

T12-49A

Exploring IFN- β -mediated new effects on tissue damage prevention in EAE: enhancement of Myeloid-Derived Suppressor Cell immunosuppressive activity

C. Melero-Jerez, M. Suardíaz, C. Marín-Bañasco, Í Fernández, F. de Castro, D. Clemente

T12-50A

TLR2-induced astrocyte MMP9 activation compromises the blood brain barrier and exacerbates collagenase-induced intracerebral hemorrhage

H. Min, J. Hong, Y. H. Jang, H. Lee, D. Kim, S.-W. Yu, S. Lee, S.J. Lee

T12-51A**Macrophage activation in perinatal brain injury**

G. Ireland, B. Fleiss, J.-C. Becher, D. Rowitch, C. Smith, J. Norman, P. Gressens, J. Pollard, V. Miron

T12-52A**The role and impact of A20 expression by microglia in neuroinflammation**

A. Mohebiany, A. Waisman

T12-53A**Neurodegeneration by a microglial complement-phagosome pathway**

L. Bodea, B. Linnartz-Gerlach, J. Kopatz, L. Sinkkonen, R. Balling, H. Neumann

T12-54A**Increased transcripts evidenced in laser-capture microdissected white matter astrocytes during experimental autoimmune encephalomyelitis in relation to immune cell infiltrate**

A.B. Nicot, F. Guillot, A. Garcia, M. Salou, S. Brouard, D. A. Laplaud

T12-55A**Astrocyte bioenergetics in multiple sclerosis: novel insights to combat neuroinflammation and -degeneration**

P. Nijland, S. van der Pol, P. van der Valk, H. E. de Vries, J. van Horssen

T12-56A**Pharmacological inhibition of CSF1R blocks microglial proliferation and prevents the progression of Alzheimer's-like pathology**

A. Olmos-Alonso, S. T. Schetters, S. Sri, K. Askew, M. Vargas-Caballero, C. Holscher, V.H. Perry, D. Gomez-Nicola

T12-57A**Roles of Cx47 and Cx32 in experimental autoimmune encephalomyelitis**

C. Papaneophytou, I. Sargiannidou, E. Georgiou, C. Abrams, K. Kleopa

T12-58A**Therapeutic role of adrenomedullin in Multiple Sclerosis: involvement in remyelination processes**

M. Pedreno Molina, I. Forte, L. Carballo, M. Delgado, E. Gonzalez-Rey

T12-59A

Changes of microglia cells associated to aging in a mouse model of accelerated senescence: the SAM P8 mice

E. Quintana, P. Velasco, A. Fernández, H. Mira, M. Vilar, S. M. Arribas, E. Cano

T12-60A

Resolvins and lipoxin promote resolution of brain inflammation

C. Rey, A. Aubert, S. Layé, B. Buaud, C. Vaysse, C. Joffre

T12-61A

Functional properties of microglia in mouse models of Alzheimer's disease

N. Saiepour, T. A. Bayer, H. W. G. Boddeke, U.- K. Hanisch

T12-62A

Nitric oxide-mediated microglial phagocytosis and why carbon monoxide could be good for the inflamed brain

H. Scheiblich, G. Bicker

T12-63A

Immune-mediated axono-glial damage—an *in vivo* two-photon imaging approach

V. Siffrin

T12-64A

Modulation of S1P receptors at the Blood Brain Barrier: do astrocytes play an essential role?

S. Spampinato, B. Obermeier, A. Cotleur, A. Love, Y. Takeshita, R. Ransohoff

T12-65A

Role of STAT3-dependent reactive astrocytes in the spinal dorsal horn in chronic itch

M. Shiratori-Hayashi, K. Inoue, M. Tsuda

T12-66A

Endothelial protein C receptor expression in microglia is regulated by Sp1

K. U. Tufekci, E. Eren, H. Ates, S. Genc

T12-67A

Microglia are involved in apoptotic clearance during chronic-relapsing EAE

I. Vainchtein, J. Vinet, S. Al-Izki, G. Pryce, C. Grit, N. Brouwer, S. Amor, D. Baker, B. Eggen, E. Boddeke

T12-68A

Inhibition of the JNK pathway as a treatment for perinatal diffuse white matter injury

E. van Tilborg, C. Heijnen, M. Benders, F. van Bel, C. Nijboer

T12-69A

The phenotypes of microglia and macrophages during epileptogenesis

J. Vinet, I. D. Vainchtein, C. Spano, C. Giordano, D. Bordini, M. Dominici, B. J. L. Eggen, G. Biagini

T12-70A

A mouse model of atopic diathesis displaying tactile allodynia with glial inflammation in the spinal cord

R. Yamasaki, J.-I. Kira

T12-71A

TUDCA skews microglia towards M2 phenotype through the G-protein coupled bile acid receptor GPBAR1/TGR5

N. Yanguas Casás, M. A. de la Barreda Manso, M. Nieto Sampedro, L. Romero Ramírez

T12-72A This poster has in the abstract book the ID T12-26B.

Multiple Sclerosis: studying lipocalin 2 as a novel player in the pathophysiology of the disease

S. Neves, S. Mesquita, C. Ferreira, J. Sousa, J. Cerqueira, N. Sousa, M. Correia-Neves, J. Palha, F. Marques

T13 NEUROVASCULAR INTERACTIONS

T13-01A

Extracellular vesicles from brain microvascular endothelial cell cultures promote survival, proliferation, and motility of oligodendrocyte precursor cells

Y. Ishizaki, M. Kurachi

T13-02A

Blood-brain barrier disruption: microglial responses and consequences for neural function

V. Rafalski, M. Merlini, J. K. Ryu, C. Syme, D. Davalos, K. Akassoglou

T13-03A

CNS lesion-induced accumulation of platelets promotes survival of adult SVZ-derived neural stem/progenitor cells

F. Rivera, I. Kazanis, M. Feichtner, S. Lange, P. Rotheneichner, S. Hainzl, M. Öller, K. Schallmoser, E. Rohde, H. A. Reitsamer, S. Couillard-Despres, H.-C. Bauer, R. J. M. Franklin, L. Aigner

T13-04A

Increase in astrocyte-blood vessel interaction is correlated with a decrease in the permeability of blood brain barrier during postnatal development in the cerebral cortex of Wistar rats

A. Rodriguez-Contreras, L. Shi

T13-05A

Microglia have roles in both of maturation and break down of the barrier function of blood brain barrier

K. Sato, Y. Shigemoto-Mogami, K. Hoshikawa, Y. Sekino

T14 REGENERATION AND REPAIR

T14-01A

Functions of histone deacetylases in Schwann cells during regeneration

V. Brügger, S. Ruff, E. Münger, P. Matthias, U. Suter, C. Jacob

T14-02A

Applying mechanistic models to prove that an M1-to-M2 polarization switch in microglia and macrophages can happen at the initiation of remyelination in cuprizone-induced demyelinating lesions

J. Cañete-Valdeón

T14-03A

Region and dynamic specificities of adult neural stem cells and oligodendrocyte precursors in myelin regeneration in the mouse brain

M. Cayre, B. Brousse, K. Magalon, P. Durbec

T14-04A

Non-steroidal anti-inflammatory drug indometacin enhances endogenous remyelination

S. Albrecht, A. Preisner, Q.-L. Cui, S. Hucke, C. Hartmann, M. M. Taketo,
J. Antel, L. Klotz, T. Kuhlmann

T14-05A

Intraventricular injection of mesenchymal stem cells in a chronic demyelinated murine model, promotes functional recovery by stimulating the endogenous oligodendrogenic program

P. Cruz Martinez, J. Jones, S. Martinez

T14-06A

Tissue plasminogen activator (tPA) acts on oligodendrocytes and promotes remyelination after white matter damage

C. Leonetti, J. Bronsard, D. Vivien, D. Clemente, F. de Castro, E. Maubert,
F. Docagne, R. Macrez

T14-07A

Spatio-temporal proteins study of rat spinal cord injury and glial cells involvement

S. Devaux, D. Cizkova, L. Slovinska, J. Blasko, M. Nagyova, C. Lefebvre,
I. Fournier, M. Salzet

T14-08A

Control of oligodendrocyte plasticity by histone demethylases after spinal cord injury

O. M. Duman, C. Jacob

T14-09A

Role of heparan sulfate in the control of myelin regeneration

B. El Waly, M. Macchi, C. Zimmer, K. Grobe, M. Cayre, P. Durbec

T14-10A

Juvenile ependymal cells show greater self-renewal potential and generate more oligodendrocytes than adult cells after spinal cord injury

E. Floriddia, X. Li, N. Guerot, K. Toskas, F. Barnabe-Heider

T14-11A

Role of L-PGDS in PNS regeneration and remyelination

M. G. Forese, M. Pellegatta, A. Trimarco, C. Rivellini, S. Previtali, C. Taveggia

T14-12A

Vulnerability and fate of oligodendroglia in areas of secondary degeneration following neurotrauma

M. Giacci, C. Bartlett, N. Hart, M. Fitzgerald

T14-13A

Mitochondrial regulation of astrocyte reactivity in response to inflammatory insult

J. Göbel, E. Motori, T.M. Eriksson, G. Wani, B. Fernando, M. Bergami

T14-14A

Analyses of epigenetic change in the injured mouse spinal cord

K. Hori, J. Kohyama, T. Sanosaka, A. Iwanami, H. Okano, M. Matsumoto, M. Nakamura

T14-15A

17β -estradiol augments axotomy-induced cell-type specific changes in P2X7 receptor expression in the mouse hypoglossal nucleus

Z. Hoyk, B. Barabási, A. Csondor, T. Martín-Pozas, A.M. Pulupa Sánchez, L. Siklós, U. Gómez-Pinedo, A. Párducz

T14-16A

Alternatively activated brain-infiltrating macrophages facilitate recovery from intracerebral hemorrhage

H. Kim, Y. H. Jang, H. Min, S.J. Lee

T14-17A

Cend1 and Neurogenin-2 drive neuronal reprogramming of astrocytes *in vitro* and *in vivo* following brain injury

P. Koutsoudaki, I. Thanou, K. Aravantinou-Fatorou, D. Thomaidou

T14-18A

Glutaredoxin 2 increases oligodendroglial capacity for regeneration after neuroinflammatory damage

K. Lepka, K. Volbracht, E. Schaberg, H.P. Hartung, N. Goebels, O. Aktas, C. Berndt

T14-19A

The role of NgR and P75NTR on the glia scar formation after traumatic brain injury

H. Liao, J. Ni, G. Liu, J. Yan, Y. Fang

T14-20A

Development of an *in vitro* microfluidic device of spinal cord injury to identify novel compounds for repair

M. McGrath, G. Robertson, M. Zagnoni, M. Riehle, S. Barnett

T14-21A

Differential abilities of acutely and chronically denervated nerve derived and skin derived Schwann cells to support axonal regeneration and remyelination

R. Midha, R. Kumar, J. Biernaskie, S. Sinha, J.A. Stratton

T14-22A

The Merlin tumour suppressor is critical for peripheral nerve regeneration and repair

T. Mindos, S. Roberts, X.-P. Dun, P. Edwards, R. Doddrell, A. Shivane, D. Parkinson

T14-23A

Intraspinal delivery of polyethylene glycol coated gold nanoparticles promotes functional recovery after spinal cord injury

F. Papastefanaki, I. Jakovcevski, N. Poulia, N. Djogo, F. Schulz, T. Martinovic, D. Ceric, G. Loers, T. Vossmeyer, H. Weller, M. Schachner, R. Matsas

T14-24A

Control of Schwann cell phenotype after nerve injury

S. Velasco, C. Gomis-Coloma, J.A. Gomez-Sanchez, H. Cabedo

T14-25A

***De novo* expression of parvalbumin in ependymal cells in response to brain injury promotes ependymal remodeling and wound repair**

V. Szabolcsi, M. R. Celio

T14-26A

Light activation of astrocytes promotes neuronal differentiation of stem cells and improves neurological deficit in stroke rats

J. TU, Y. Liu, F. Yang, Y. Liu, L. Wang

T14-27A

Comparison of HDAC functions in oligodendrocyte and Schwann cell plasticity after axon injury

A. Vaquié, S. Ruff, E. Münger, C. Pattaroni, N.L. Jeon, C. Lamy, C. Jacob

T15 TRANSMITTER RECEPTORS, ION CHANNELS AND GAP JUNCTIONS

T15-01A

Changes in glial glutamate transporters protein levels in TMEV model of viral-induced epilepsy

G. Albertini, J. Loewen, J. Van Liefferinge, E. Bentea, T. Demuyser, E. Merckx, L. Deneyer, I. Smolders, K. Wilcox, A. Massie

T15-02A

Regulation from cytosolic alkalosis by reversed sodium-bicarbonate cotransporter NBCe1 in mouse cortical astrocytes

S. Theparambil, Z. Naoshin, A. Thyssen, J. Deitmer

T15-03A

HCO₃⁻-independent pH regulation in astrocytes in situ is dominated by V-ATPase

D. B. Hansen, N. Garrido-Comas, M. Salter, R. Fern

T15-04A

Connexin channel inhibitor promotes the anti-hyperalgesic effect of amitriptyline in sciatic nerve-ligated rats

T. Jeanson, A. C. Figueiredo, D. Richard, A. Duchène, S. Bourgoin, C. Picoli, F. Mouthon, C. Giaume, M. Hamon, M. Charvériat

T15-05A

Gating of aquaporin 4—phosphorylation versus protonation

M. Assentoft, S. Kaptan, R. A. Fenton, S. Z. Hua, B. L. deGroot, N. MacAulay

T15-06A

Prenatal exposure to inflammatory conditions increases hemichannel opening and activation of astrocytes in the offspring: repercussion on neuronal survival

J. A. Orellana, B. Avendaño, T. Montero, C. Chavez, R. von Bernhardi

T15-07A

Expression of functional ionotropic glutamate and GABA receptors in astrocytes of the ventrobasal thalamus

G. Seifert, S. Höft, S. Griemsmann, C. Steinhäuser

T15-08A

Dye coupling between cells from subventricular zone neurospheres and glia

R. Talaverón, P. Fernández, R. Escamilla, M. Pastor, J. C. Sáez, E. R. Matarredona

T15-09A

The HYS-32-enhanced Cx43 stability at plasma membrane is caveolae-dependent

J.-C. Wu, C.-H. Chang, C.-K. Liao, C.-C. Shen, C.-C. Wang, H.-S. Wang

T15-10A

Functional characterization of astrocytes within the ventral midbrain

W. Xin, A. Bonci

T15-11A

Regulation of BDNF mRNA expression in astrocytes by catecholamines

I. Koppel, A. Pennert, K. Jaanson, T. Tiirik, T. Timmusk

T15-12A

AMPA receptor signalling in oligodendrocyte development

E. Kougioumtzidou, R. Sprengel, D. Attwell, W.D. Richardson

T16 TROPHIC FACTORS

T16-01A

Changes in expression and localisation of Sphingosine 1-Phosphate Receptor-1 (S1P₁R) in the young and middle-age rat brain

G. Sheridan, M. Velasco

T17 TUMOURS

T17-01A

Glioma-initiating cells upregulate IL-6 secretion in microglia/brain macrophages via Toll-like receptor 4 signaling

O. a Dzaye, F. Hu, K. Derkow, P. Euskirchen, C. Harms, S. Lehnhardt, M. Synowitz, S. Wolf, H. Kettenmann

T17-02A

Inhibition of glioma progression by a newly discovered CD38 inhibitor

E. Blacher, B. Ben Baruch, A. Levy, N. Geva, K. D. Green, S. Garneau-Tsodikova, M. Fridman, R. Stein

T17-03A

Adoptive M1/M2 modulation of microglia as an immunotherapeutic strategy against glioma

L.D.R. Cisneros Castillo

T17-04A

A cell division cycle 7-related protein kinase inhibitor suppresses glioblastoma cell growth *in vitro*

E.P. Erkan, M. Dinc, E. Eren, J. Allmer, T. Yalcin, S. Genc

T17-06A

A promising therapy against human glioblastoma stem cells: cell-penetrating peptides based on the interaction between connexin43 and c-Src

M. Jaraíz Rodríguez, M. Domínguez Prieto, J. Medina, A. Tabernero

T17-07A

Light-controlled inhibition of malignant glioma by opsin gene transfer

Y. Liu, F. Yang, J. Tu, L. Wang

T17-08A

The role of Cytoplasmic Polyadenylation Element Binding proteins in the pathogenesis of gliomas

M. Skubal, M. Theis, C. Steinhäuser, A. Waha

T17-09A

GFAP in astrocytic tumors

E. van Bodegraven, O. Stassen, M. Moeton, M. van Strien, P. Robe, E. Hol

ACHUCARRO BASQUE CENTER FOR NEUROSCIENCE

Achucarro Basque Center for Neuroscience is devoted to the study of glial cells function in physiology and pathophysiology, a fundamental and translational research centre created by Ikerbasque – the Basque Foundation for Science and the University of the Basque Country (UPV/EHU) in mid-2012. The centre is named after Nicolas Achucarro (Bilbao, 1880–1918), an internationally recognized Basque neuroscientist who made relevant contributions to the biology of glia.

The goal of the Achucarro centre is to perform world-class research in the study of neuron-glia biology in the normal and pathological brain. This research focus will allow us to contribute to the training of future generations of neuroscientists and be an active partner in the dissemination of the human knowledge about the brain.

Our current research programme covers the following areas:

- In-depth understanding of the organisation and information processing in neural circuitries;
- Identification of genetic and molecular backgrounds of neural circuits during development and ageing;
- Characterisation of genetic, molecular and cellular mechanisms of neurodegenerative and autoimmune-mediated brain diseases; and
- Translational research aimed at the development of new strategies for the treatment of brain diseases.

For more information: www.achucarro.org | info@achucarro.org

Poster Session II

Friday, July 17 13:15–15:15

Saturday, July 18 13:00–15:00

T01 CELL MIGRATION

T01-01B

Crosstalk between early fate determinant and chemo-tropism controls collective glial migration

T. Gupta, A. Kumar, A. Giangrande

T01-02B

Myelin proteolipid protein mediates the association of alpha V integrin and the AMPA glutamate receptor *in vivo* and regulates glutamate-induced migration of oligodendrocyte progenitor cells through GluR2 internalization

D. Harlow, K. Saul, H. Komuro, W. Macklin

T01-03B

Role of ERK and Rho associated protein kinase (ROCK) signalling in PDGF-A induced Oligodendrocyte progenitor cells migration and cytoskeleton reorganization

J. Singh, K. Sharma, P. Pillai

T02 CELL PROLIFERATION, LINEAGES AND DIFFERENTIATION

T02-01B

Profiling of the different genes regulated during astrocyte differentiation

C. Birck, P. Heuschling, L. Grandbarbe

T02-02B

Phenotypic heterogeneity of dividing oligodendrocyte progenitor cells and of their progeny: characterization and modulation by aging and extrinsic factors

E. Boda, S. Di Maria, C. Rolando, P. Rosa, V. Taylor, M. P. Abbracchio, A. Buffo

T02-03B

Microglial cells during embryonic development of the mouse brain—mature team players or young bench sitters?

B. Brone, N. Swinnen, S. Smolders, P. Legendre, J.-M. Rigo

T02-04B

Calmodulin inhibition affects proliferation and cell viability in unchallenged and LPS-challenged pure microglial cultures

K. Dulka, M. Szabo, K. Gulya

T02-05B

Rapid and efficient generation of human oligodendrocytes from induced pluripotent stem cells

M. Ehrlich, S. Albrecht, K.-P. Kim, J. Sterneckert, H. Zaehres, H. Schöler, T. Kuhlmann

T02-07B

RXR-VDR signaling regulates oligodendrocyte precursor cell differentiation

A. Guzman de la Fuente, O. Errea, C. Kerninon, P. van Wijngaarden, G.A. Gonzalez, J.K. Huang, C. Zhao, B. Nait Oumesmar, C. ffrench-Constant, R.J. Franklin

T02-08B

Characterization of Tensin3 (*Tns3*) function in oligodendrogenesis and remyelination

H. Hmidan, C. Parras

T02-09B

Cell fate of NG2 glia in the developing mouse spinal cord

W. Huang, X. Bai, L. Schlosser, A. Scheller, F. Kirchhoff

T02-10B

Activity-dependent effects on oligodendrocyte precursors and mature oligodendrocytes in the adult sensorimotor cortex and corpus callosum

S. Keiner, F. Niv, T. Steinbach, O.W. Witte, C. Redecker

T02-11B

Mature astrocytes regain stem cell potential and give rise to neurons

S. Kirner, M. Leist

T02-12B

Interleukin-33 (IL-33) as a factor involved in the regulation of oligodendrocyte precursor cells biology

K. Konarzewska, B. Wyłot, B. Kaza, J. Ułańska-Poutanen, M. Zawadzka

T02-13B

Characterization of the role of RET on enteric progenitors using Mosaic Analysis with Double Markers (MADM)

R. Lasrado, D. Bell, V. Pachnis

T02-14B

Characterization of Chd7 expression and function in oligodendrogenesis and (re)myelination

C. Marie, M. Frah, C. Parras

T02-15B

Identification and characterization of distinct astroglia subpopulations in health and disease

S.J. Miller, Z. Chen, T. Philips, M. Robinson, R. Sattler, J. Rothstein

T02-16B

The PI3K/Akt inhibitor LY294002 induces astrogliosis in mouse cerebellar slices

F. Pieropan, A.D. Rivera, K. Azim, A.V. Patel, R. Gibbs, P. Cox, A.M. Butt

T02-17B

Cell genesis and dendritic plasticity: a neuroplastic pas de deux in the onset and remission from depression

L. Pinto, A. Mateus-Pinheiro, A.R. Machado-Santos, P. Patrício, N.D. Alves, J. Oliveira, N. Sousa

T02-18B

Nasturctured interface promoting astrocytes molecular and functional differentiation in vitro

A. Pistone, T. Posati, P. Nicchia, A. Sparaneo, M. Caprini, F. Formaggio, E. Saracino, M. Nocchetti, A. Sagnella, S. Bonetti, G.P. Ruani, M. Muccini, B. Valentina

T02-19B

S100B modulates oligodendrocyte development process

G. Santos, V. Afonso, A. Barateiro, A. Fernandes, D. Brites

T02-20B

Poster retracted

T02-21B

Role of Dbx1 and Notch signalling in the specification of a subset of spinal astrocytes

M. M. Sartoretti, D. Di Bella, A. Carcagno, G. Lanuza

T02-22B

Genetic ablation of proliferating NG2-glia in the adult brain

S. Schneider, C. Simon, G. Eichele, M. Götz, L. Dimou

T02-23B

Chimeric OHSCs as culture system to study microglia phenotypes

C. A. van der Pijl, H. R. van Weering, A. Masuch, K. P. H. Biber, B. J. L. Eggen, H. W. G. Boddeke

T03 CELL SIGNALING

T03-01B

Thyroid hormone and AMPc/PKA pathway play a role in the elongation of oligodendroglial processes

L. O. Felgueiras, C. Oliveira da Silva, V. Younes-Rapozo, E. Giestal de Araújo, A. Pereira da Costa, J. Vailant, F. Tenório, P. C. Barradas

T03-02B

Phospholipases A2 isolated from *Micruurus lemniscatus* snake venom inhibits cell proliferation through the activation of p53 in cultured astrocytes

S. Castro Afefche, D. Augusto Maria, M. Garcia Laveli da Silva, M. R. Lopes Sandoval, A. de Souza Imberg, L. Bartlewski, E. Osorio Frare

T03-03B

The role of CPI-17 in Merlin-dependent small GTPase regulation in oligodendrocytes

C. Dornblut, H. Morrison

T03-04B

Astrocytic endfeet show unique Ca^{2+} response to osmotic stress

M. Eilert-Olsen, W. Tang, R. Enger, V. Jensen, A. E. Thoren, E. A. Nagelhus

T03-05B

Astrocyte calcium microdomains in response to sensory stimulation *in vivo*

K. Ferrari, J. L. Stobart, M. Barrett, B. Weber

T03-06B

c-Jun is activated by LDL receptor-related protein-1 (LRP1) in Schwann cells

A. Flütsch, K. Henry, S. L. Gonias, W. M. Campana

T03-07B

IL-6 family cytokines selectively activate different signaling pathways in sensory-neuron associated glia and modulate each other signaling in a time and concentration specific manner

A. Garza-Carbajal, S. Brosig, T. Hucho

T03-08B

Calcium regulation of mitochondrial respiration in astrocytes

I. Juaristi, A. del Arco, J. Satrustegui, I. Llorente-Folch

T03-09B

Cross-talk of signaling and energy-delivering processes in astrocytes: interaction of carnitine transporter OCTN2 with phosphatase PP2A

B. Juraszek, K. Nalecz

T03-10B

An organic device for stimulation and optical read-out of calcium signalling in primary rat cortical astrocytes

S. Karges, S. Bonetti, A. I. Borrachero Conejo, A. Pistone, S. D. Quiroga, M. Natali, I. Grishin, S. Pecqueur, F. Mercuri, M. Caprini, G. Generali, M. Muccini, S. Toffanin, V. Benfenati

T03-11B

CREB: a new player in the regulation of astrocytic calcium signalling

A. Eraso, E. Vicario, L. Pardo, E. Galea, R. Masgrau

T03-12B

A functional metabotropic-like NMDAR in rat cultured astrocytes

P. Montes de Oca Balderas, P. Aguilera

T03-13B

Differential secretion of peptidergic vesicles in astrocytes and neurons

V. Pla, S. Paco, E. Pozas, N. Lauzurica, M. García-San Frutos, J. Pérez-Clausell, T. Fernández-Agulló, F. Aguado

T03-14B

Src-like tyrosine kinases mediate amyloid β -induced myelin dysregulation in Alzheimer's disease models

T. Quintela, A. Wyssenbach, C. Matute, E. Alberdi

T03-15B

Astrocyte shape changes and tonic cAMP signalling

N. Vardjan, M. Kreft, R. Zorec

T03-16B

Schwann cell autophagy, myelinophagy, initiates myelin clearance from injured nerves

J. A. Gomez-Sanchez, L. Carty, M. Iruarrizaga-Lejarreta, M. Palomo-Irigoyen, M. Varela-Rey, R. Mirsky, A. Woodhoo, K. R. Jessen

T03-17B

A crosstalk between rock and NADPH-oxidase mediates the microglial inflammatory response

A. Borrajo, A.I. Rodriguez-Perez, J. Rodriguez-Pallares, P. Garrido-Gil, M.J. Guerra, J.L. Labandeira-Garcia

T04 CYTOSKELETON

T04-01B

Astroglial architecture of Squamata as compared to the astroglia of Crocodilia and Testudines. A GFAP study

M. Kalman, D. Lorincz

T04-02B

Stress in mice rapidly changes enteric glial morphology through cytoskeletal reorganization

B. Lee, K. Sharkey

T05 DEGENERATIVE DISEASE, TOXICITY AND NEUROPROTECTION

T05-01B

A_{2A} receptor blockade prevents microglia reactivity triggered by elevated hydrostatic pressure

I. Aires, R. Boia, C. Neves, M. Madeira, F. Ambrósio, A.R. Santiago

T05-02B

Neuroprotective effects of the nucleoside guanosine under acute hyperammonemia in a rat model of hepatic encephalopathy

P. Arend Guazzelli, G. dos Santos, L. Paniz, M. E. Calcagnotto, J. Souza, G. Hansel, C. Zenki, E. Kalinine, D. Souza, A. de Assis

T05-03B

EAE is associated with increased expression of mitochondrial proteins within the dorsal spinal cord: implications for pain in the disease

C. Benson, M. S. Yousuf, B. Kerr

T05-04B

Blockade of adenosine A_{2A} receptor confers neuroprotection against retinal ischemia-reperfusion injury through the control of neuroinflammation

R. Boia, M. Madeira, F. Elvas, T. Martins, F. Ambrósio, A. R. Santiago

T05-05B

Inhibition of Casein Kinase 2 reduces AMPA-induced oligodendrocyte death through JNK signaling and ER stress regulation

M. Canedo, F. Llavero, J. Zugaza, C. Matute, M. Sánchez-Gómez

T05-06B

Intravital microglial lysosome imaging

E. Capetillo-Zarate, S. Solé Domenech, D. Cruz, C. Matute, F. R. Maxfield

T05-07B

Knocking out the Na⁺/Ca²⁺ Exchanger NCX3 impairs oligodendrocyte lineage responses, anticipates the onset, and increases the severity of Experimental Autoimmune Encephalomyelitis

A. Casamassa, C. La Rocca, G. Matarese, L. Annunziato, F. Boscia

T05-08B

A role of SRY on gender-selective modulation of astrocytic cell viability by oxidative stress

K. S. Cho, S. M. Yang, K. J. Kwon, C. Y. Shin

T05-09B

Neuroprotective effects of guanosine in an glutamatergic excitotoxic condition in hippocampal slices from adult mice

A. de Assis, Y. Nonose, J. Souza, P. Egon Gewehr, P. de Freitas, L. Pellerin, D. O. Souza

T05-11B**Anti-IL34 treatment reduces microglia density**

C. Easley-Neal, R. Weimer, A. Zarrin

T05-12B**Glial cell-dysfunction and therapeutic potential of trehalose in an early Huntington's disease cellular model**

A. Gaudioso, J. Perucho, E. Edo, M. P. Muñoz, A. Gomez, Z. Hozova, P. G-Rozas, M. A. Mena, M. A. Fernandez Estevez, J. A. Rodriguez Navarro, M. J. Casarejos

T05-13B**Schwann cells regulate synaptic function at developing neuromuscular synapses**

D. Heredia, A. Scurry, C. Feng, G. Hennig, T. Gould

T05-14B**Erythropoietin affects the dynamic brain edema response following experimental traumatic brain injury**

E. Gunnarson, J. Blixt, M. Wanecik

T05-15B**Iron loading with ferrocene induces iron mismanagement in organotypic hippocampal slices**

S. Healy, J. McMahon, U. FitzGerald

T05-16B**Biochemical and pharmacological evidence for the existence of spare glutamate transporters—the concept of transporter reserve**

E. Hermans, C. Ingelbrecht, N. Desmet

T05-17B**A methodology for isolation and culture of adult astrocytes for Alzheimer's Disease research**

T. Iram, D. Frenkel

T05-20B**Early activation of microglia plays a central role in the disease pathogenesis of progressive myoclonus epilepsy, EPM1**

I. Körber, T. Joensuu, S. Katayama, P. Hakala, E. Einarsdottir, J. Kere, A.-E. Lehesjoki

T05-21B

Influence of autoimmune inflammation on remyelination in cuprizone-induced demyelination

P. Kunz, A. Escher, A. Barrantes-Freer, S. Nessler, W. Brück, C. Stadelmann-Nessler

T05-22B

Inhibition of microglial activity is a major mechanism in neuroprotection of dopaminergic neurons by inhibition of Rho-kinase

J.L. Labandeira-Garcia, A. Borrajo, A.I. Rodriguez-Perez, J. Rodriguez-Pallares, C. Diaz-Ruiz, M.J. Guerra

T05-23B

Alterations of astrocytes proteome induced by beta-amyloid peptide: implications for Alzheimer disease pathogenesis

P. Leprince, C. Monoyer, A. Bentaib

T05-24B

LIF haplodeficiency desynchronizes glial reactivity prolonging damage and functional deficits after a consecutive brain injury

S. Levison, M. Goodus, N. Ahmed, R. Talwar, D. Buziashvili, K. Pang

T05-25B

Neuroprotective effect of pre-treatment with vitamin D against homocysteine-induced cellular dysfunction in cerebral cortex slices of rats

A. Longoni, J. Kolling, C. Siebert, J. dos Santos, J. Souza, L. Pettenuzzo, C. A. Gonçalves, A. M. de Assis, A. T. Wyse

T05-26B

Caffeine attenuates neuroinflammatory response and retinal ganglion cell loss in an ocular hypertension animal model

M. H. Madeira, A. Ortín-Martínez, F. M. Nadal-Nicolas, M. Agudo-Barriuso, M. Vidal-Sanz, A. Ambrósio, A. R. Santiago

T05-27B

Increased vulnerability to excitotoxicity in spermine oxidase overexpressing mouse: astrocyte-dependency

M. Marcoli, C. Cervetto, L. Vergani, M. Passalacqua, N. Berretta, M. D'Amelio, G. Maura, P. Mariottini, A. Voci, M. Cervelli

T05-28B

Regulation of the fractalkine ligand in human astrocytes

S. O'Sullivan, F. Gasparini, A. Mir, K. Dev

T05-29B

Platelet derived growth factor and retinal neuroprotection: the impact on microglia

A. Osborne, R. Chong, K. Martin

T05-30B

Characterization of astroglial contribution to C9ORF72 Amyotrophic Lateral Sclerosis (ALS) using patient-derived iPS astrocytes

J. Pham, R. Sattler, J. Rothstein

T05-31B

The neuroprotective role of microglia against amyloid beta toxicity in organotypic hippocampal slice cultures

M. Richter, A. Dolga, K. Biber, C. Culmsee, R. Dodel

T05-32B

Lysyl oxidase is a novel target of lithium that regulates astroglogenesis in adult CNS white matter

A. D. Rivera, E. Green, R. O. Carare, A. M. Butt

T05-33B

Specific expression of the neurotoxic microRNA family let-7 in the cerebrospinal fluid of patients with Alzheimer's disease

R. Rößling, K. Derkow, C. Schipke, J. Bauer, C. Krüger, O. Peters, S. Lehnhardt

T05-34B

Caffeine modulates retinal neuroinflammation and cell survival in retinal ischemia

A. R. Santiago, R. Boia, P. Tralhão, M. H. Madeira, F. Elvas, E. C. Szabó, I Tomé, A. Ambrósio

T05-35B

Mechanism of nimodipine-dependent inhibition of amyloid b stimulated interleukin 1-beta production from microglia

J. M. Sanz, P. Chiozzi, G. Zuliani, F. Di Virgilio

T05-36B

Demyelination induces functional deficit in the non-human primate optic nerve

N. Sarrazin, S. Gilardeau, P. Moisonnier, S. Rosolen, C. Lamirel, S. Picaud, J. Lorenceau, P. Pouget, A. Baron-Van Evercooren

T05-37B

Astrocytes increase fatty acid oxidation following traumatic brain injury in the developing brain

S. Scafidi, J. Jernberg, C. Bowman, M. Wolfgang

T05-38B

Low molecular weight polysialic acid shows anti-inflammatory effects on human THP1 macrophages

A. Shahraz, J. Kopatz, H. Neumann

T05-39B

Effect of long-term paroxetine treatment on Ab pathology and microgliosis in the APP_{swe}PS1_{ΔE9} mouse model of Alzheimer's disease

M. Sivasaravanaparan, M. Severino, L. Ørum Olesen, R. Jordan Tenney, E. Bouzinova, A. Babcock, J. Hasselstrøm, J.B. Gramsbergen, O. Wiborg, B. Finsen

T05-40B

Alzheimer's amyloid degradation by secreted lysosomal enzymes

S. Sole Domenech, D. Wakefield, E. Capetillo Gonzalez de Zárate, D. Cruz, B. Baird, F. Maxfield

T05-41B

Traumatic brain injury in the mouse leads to proliferation of oligodendrocyte progenitor cells in important white matter tracts

J. Flygt, F. Clausen, N. Marklund

T05-42B

siRNA screen of microglia to identify neuroprotective drug targets in Parkinson's disease

M. Delgado, M. Pedreño, E. González-Rey, V.E. Neubrand

T06 EXTRACELLULAR MATRIX AND CELL ADHESION MOLECULES

T06-01B

Investigation of oligodendrocyte differentiation in the inhibitory multiple sclerosis lesion microenvironment *in vitro*

S. Cummings, R. Kothary

T07 GENE EXPRESSION AND TRANSCRIPTION FACTORS

T07-01B

Deciphering the role of Etv5 in neural crest progenitor development and Schwann cell fate specification

A. Balakrishnan, Y. Touahri, D. Zinyk, J. Biernaskie, C. Schuurmans

T07-02B

Direct conversion of fibroblasts into functional astrocytes by defined transcription factors

V. Broccoli, M. Caiazzo, S. Giannelli, P. Valente, G. Lignani, A. Sessa, F. Benfenati

T07-03B

Brca1 is expressed in human microglia and is deregulated in human and animal model of ALS

H. Noristani, J. C. Sabourin, Y. Gerber, M. Teigell, A. Sommacal, M. dM Vivanco, M. Webber, F. Perrin

T07-04B

Rapid and highly efficient induction of oligodendrocytes from human pluripotent stem cells by forward programming

M. Pawlowski, D. Ortmann, A. Bertero, L. Vallier, M. Kotter

T07-05B

Identification of a new potential marker for a subpopulation of astrocytes

A. Quiroga, W. D. Richardson, H. Li

T07-06B

Interactions of Sox10 with TGF-B SIGNALING in Schwann cells

J. Rodríguez-Molina, C. Zhang, J. Svaren

T07-07B

Impact of transcription factor Sox13 on oligodendrocyte development in the embryonic mouse spinal cord

T. Baroti, E. Sock, M. Wegner, C. Stolt

T07-08B

Astrocyte-specific transcriptional response to glucocorticoid receptor stimulation—metabolic implications

M. Tertil, S. Golda, A. Wawrzczak-Bargiela, M. Korostynski, M. Piechota, M. Slezak, R. Przewlocki

T07-09B

Local self-renewing of microglia is dependent on Interleukin-1 signaling

J. Bruttger, K. Karram, S. Woertge, T. Regen, F. Marini, N. Hoppmann, M. Klein, T. Blank, S. Yona, Y. Wolf, E. Pinteaux, M. Mack, W. Müller, F. Zipp, H. Binder, T. Bopp, M. Prinz, S. Jung, A. Waisman

T07-10B

Astrocytic CREB is a therapeutic target in acute brain injury

L. Pardo Fernández, A. Schlüter, L. M. Valor, A. Barco, M. Giralt, J. Hidalgo, Z. Zhao, P. Jia, M. Jové, M. Portero-Otin, M. Ruiz, L. Giménez-Llort, R. Masgrau, A. Pujol, E. Galea

T07-11B

Development and validation of flexible system for selective genetic manipulation of astrocytes in wild-type mouse

M. Slezak, F. De Vin, A. Vandebroek, M. Holt

T07-12B

Definition of the microglial activome from individual mice revealed by RNAseq

H. Hirbec, C. Roubert, I. Richard, C. Marmai, A. Esclangon, M. Didier, N. Civic, R. Peyroutou, M. Boulpicante, C. Rey, M. Docquier, F. Rassendren

T07-13B

Targeting microglia using the specific transcription factor Sall1

A. Buttgereit, I. Lelios, R. Nishinakamura, B. Becher, M. Greter

T08 GLIAL-NEURONAL INTERACTIONS

T08-01B

GLAST-CreERT2/KOeif2b a relevant mouse model for the CACH/VWM leukodystrophy

R. Abdel Rassoul

T08-02B

Opposing effects of a toll-like receptor 9 antagonist on spinal cord neuronal viability through direct versus astrocyte-mediated actions

C. Acioglu, A. T. Baykal, R. F. Heary, S. Elkabes

T08-03B

A differential astrocyte reactivity is induced by omega-3 fatty acid deficiency in nuclei of rat basal ganglia

B. Andrade-da-Costa, D. Santana, H. Cardoso, C. Pimentel, E. Santos-Junior, P. Passos, M. Rodrigues

T08-04B

Mouse embryo dorsal root ganglia neuron survival was decreased in the absence of microglia

M. Angelim, L. Maia, A. Amancio-dos-Santos, C. Mouffle, E. Bullier, F. Guinoux, H. Le Corronc , P. Legendre

T08-05B

How does neuronal activity regulate the formation and function of myelinated axons in vivo?

M. Baraban, S. Mensch, D. Lyons

T08-06B

Glial cells in the enteric nervous system are sensitive to synaptic and non-synaptic neuronal activity

W. Boesmans, M. M. Hao, V. Pachnis, P. Vanden Berghe

T08-07B

Functional GABA-A receptors in Schwann Cells are cross-regulated in GABA-B Null mice

L. F. Castelnovo, S. Melfi, V. Bonalume, A. Faroni, A. Reid, P. Procacci, L. Wrabetz, A. Verkhratsky, V. Magnaghi

T08-08B

Purinergic P2Y₂ receptors on satellite glial cells as new potential targets for the pharmacological control of trigeminal sensitization

G. Magni, D. Merli, C. Verderio, M. P. Abbracchio, S. Ceruti

T08-09B

Glial abnormalities parallel neuronal impairment in human enteric nervous system

C. Cirillo, A.-S. Desmet, J. Tack, P. Vanden Berghe

T08-10B

mGluR5-mediated calcium signalling in rat cortical primary astrocytes is modulated by adenosine A1 and A2A receptors

H. de Castro Abrantes, P. Avelar, M.J. Diógenes, A. Sebastião, S. Vaz

T08-12B

Neuronal alarmin IL-1 α evokes astrocyte-mediated protective signals against oxaliplatin neurotoxicity

L. Di Cesare Mannelli, M. Zanardelli, B. Tenci, A. Pacini, C. Ghelardini

T08-14B

Astroglial networks modulation of bursting activity dynamics

E. Dossi, O. Chever, U. Pannasch, M. Derangeon, N. Rouach

T08-15B

Dynamics of ionic shifts in cortical spreading depression

R. Enger, W. Tang, G.F. Vindedal, V. Jensen, P.J. Helm, R. Sprengel, L.L. Looger, E.A. Nagelhus

T08-16B

Neurofilaments enter in oligodendrocytes via clathrin-dependent endocytosis to promote their growth and survival in vitro

J. Eyer, C. Fressinaud

T08-17B

Role of the alpha-secretase TACE in Central Nervous System myelination

E. Fredrickx, E. Colombo, G. Dina, A. Quattrini, C. Taveggia

T08-18B

Age-related cognitive impact in a transgenic model of astrocytic dysfunction

S. Guerra-Gomes, V. Sardinha, G. Tavares, J. Correia, M. Martins, N. Sousa, L. Pinto, J. Oliveira

T08-19B

An astrocyte-dependent mechanism that links increased TNF α levels to a persistent change of function in cognitive circuits: relevance to multiple sclerosis

S. Habbas, M. Santello, H. Stubbe, G. Zappia, N. Liaudet, F. Klaus, G. Kollias, A. Fontana, C. Pryce, T. Suter, A. Volterra

T08-20B

Nanofiber-platform for human pluripotent stem cell-derived neural cells

A. Hyysalo, M. Ristola, T. Joki, S. Narkilahti

T08-21B

Generation of astrocytes from human induced pluripotent stem cells to investigate astrocyte biology in neurodegenerative diseases

K. Janssen, R. De Filippis, S. Hoerner, D. Gomm, C. Kiefer, B. Liebel, V. Lakic, G. C. Terstappen, M. H. M. Bakker

T08-22B

Astrocytes gate synaptic transmission from unmyelinated sensory afferents

J.-F. Perrier, R. Christensen, R. Delgado-Lezama, R. Russo, B. Lykke Lind, E. Loeza Alcocer, G. Fabbiani, N. Schmitt, M. Lauritzen, A. V. Petersen, E. Meier Carlsen

T08-23B

Metabolic modulation of mitochondria reduced glial reactivity and hyperalgesia in inflammatory and neuropathic chronic pain models

N. Lago, V. Lagos-Rodríguez, L. Martínez-Palma, A. Cassina, P. Cassina

T08-24B

3D volume imaging of calcium dynamics in astrocytes

N. Liaudet, E. Bindocci, I. Savtchouk, C. Dürst, A. Volterra

T08-25B

Fractalkine signaling is not required for ocular dominance plasticity

R. Lowery, C. Charbonneau, B. Hopkins, A. Majewska

T08-26B

Electrophysiological characterization of human pluripotent stem cell derived oligodendrocyte precursor cells

M. Mäkinen, A. Hyysalo, S. Narkilahti

T08-27B

Flavonoid hesperidin modulates synapse formation on cerebral cortex and increases the synaptogenic potential of astrocytes

I. Matias, L. Diniz, A. Buosi, A. P. Araújo, J. Stipursky, F. Carvalho Alcantara Gomes

T08-28B

Neuronal activity dependent regulation of CNS-precursor cells in health and disease

M. Matthey, J. Stockley, C. Watts, R. T. Káradóttir

T08-29B

Purines released from astrocytes inhibit excitatory synaptic transmission in the ventral horn of the spinal cord

E. M. Meier Carlsen, J.-F. Perrier

T08-30B

Membrane mobility of the astroglial glutamate transporter GLT-1

P. Michaluk, D. Rusakov

T08-31B

EphB3 regulates gliotransmission following traumatic brain injury

E. Perez, D. Liebl

T08-32B

Microglia changes in rat dorsal cochlear nucleus correlate to behavioural tinnitus evidence

P. Perin, A. Venturino, A. Oda, A. Capetta, G. Colombo, G. Sanchini, V. Vitale, V. Bertone, R. Pizzala

T08-33B

Glia-to-neuron shuttling of miR-146a via extracellular microvesicles modulates synaptotagminI translation in neurons

I. Prada, E. Turola, L. Amin, M. Gabrielli, F. Drago, J. Franck, G. Legname, R. Furlan, J. Vizioli, D. Cojoc, F. Peruzzi, C. Verderio

T08-34B

Development of co-culture platform for neuron-oligodendrocyte research

M. Ristola, M. Mäkinen, A. Hyysalo, L. Sukki, T. Ryynänen, J. Kreutzer, L. Ylä-Outinen, J. Lekkala, P. Kallio, S. Narkilahti

T08-35B**Müller cells heterogeneity in vitro**

N. Ruzafa, X. Pereiro, Y. Filali-Mouncef, E. Vecino

T08-36B**Electrophysiological characterization of the prefrontal cortex and hippocampus connection in a genetic model of astrocytic dysfunction**

V. Sardinha, S. Guerra-Gomes, G. Tavares, J. Correia, M. Martins, N. Sousa, J. Oliveira

T08-37B**The pros and cons of studying astrocytic Ca^{2+} dynamics with genetically-encoded Ca^{2+} indicators: a high-resolution two-photon comparative analysis with synthetic dyes**

I. Savtchouk, E. Bindocci, N. Liaudet, A. Agarwal, D. Bergles, A. Volterra

T08-38B**Release of glutamate and ATP induced by optogenetic activation of astrocytes**

W. Shen, C. Meunier, E. Audiant

T08-39B**Activity-dependent neuroglial remodeling enhances extrasynaptic glutamate signaling and optimizes adaptive neuronal responses to a physiological challenge**

J. Stern, K. Naskar

T08-40B**A novel open source tool to study astrocytic morphology**

G. Tavares, V. Morais Sardinha, S. Guerra Gomes, J. Correia, M. Martins, A. R. Machado Santos, N. Sousa, L. Pinto, J. Oliveira

T08-41B**Microglia in the early development of inhibitory cortical circuits**

M. Thion, P. Squarzoni, M. Coralie-Anne, D. Low, F. Ginhoux, E. Audinat, S. Garel

T08-42B**Implication of microglial fractalkine receptor in hypothalamic control of metabolism**

Z. Winkler, Ī Polyák, D. Kuti, S. Ferenczi, D. Kővári, K.J. Kovács

T08-43B**CD11c⁺ microglia are potent producers of IGF-1 during postnatal neurodevelopment**

A. Włodarczyk, N. Martin, T. Owens

THE UNIVERSITY OF THE BASQUE COUNTRY

The University of the Basque Country (UPV/EHU) is the only public university in the Basque Country. It has three campuses in the three Basque provinces (Biscay, Gipuzkoa and Alava) and covers almost all the areas of knowledge, a vibrant 30-year-old institution with 45,000 students, 5,000 world-class academic staff and state-of-the-art facilities.

The UPV/EHU is the main research institution in the Basque Country, carrying out most of the basic research made in that territory and taking advantage of the good industrial environment in the region.

The UPV/EHU counts with a number of 400 researchers and support personnel working in the different areas of neurosciences, in the Departments of Neurosciences; Pharmacology; Cell Biology and Histology; Physiology; and Genetics, Physical Anthropology and Animal Physiology.

EUSKAMPUS – CAMPUS OF INTERNATIONAL EXCELLENCE

In 2010, the Spanish Ministry for Education awarded the University of the Basque Country the “Campus of International Excellence” award for its project known as Euskampus. Under the slogan “One University, One Country, One Campus”, Euskampus seeks to combine the excellence and internationalisation of the University and link it to the Country through three (or four?) main areas of specialization or knowledge hubs: Innovative Processes and New Materials; Sustainable Eco-systems and Environmental Technologies; Quality of Life and Healthy Ageing; and Social Innovation.

The Knowledge Hub for Neurosciences, named “Mens Sana”, builds on an old ambition of the research community in this field to boost multidisciplinarity as well as intra- and inter-institutional collaboration. With this perspective, the Hub has defined strategic objectives that must guide the actions by the research and technology institutions working in the field in the Basque Country: UPV/EHU, Achucarro, BCBL, BioCruces, BioDonostia, CIC biomaGUNE, Tecnalia and the three main University Hospitals of the three provinces.

T09 ISCHEMIA AND HYPOXIA

T09-01B

Astrocyte diversity in response to stroke

A. Gleichman, R. Kawaguchi, Z. Guo, M. Sofroniew, P. Yu, G. Coppola, S. T. Carmichael

T09-02B

Impact of an ischemic episode on the physiology of Bergmann glial cells

R. Helleringer, O. Chever, H. Daniel, M. Galante

T09-03B

The immune receptor Mincle in microglia is a key initiator of tissue damage in ischemic stroke

S. Manzner, T. V. Arumugam, Y.-H. Hsieh, M. Gelderblom, K. P. MacDonald, G. R. Hill, R. B. Ashman, T. Magnus, C. A. Wells

T09-04B

Brain energy metabolism is impaired by the propagation of focal ischemic damage

Y. Nonose, P. Egon Gewehr, P. de Freitas, G. Müller, R. F. Almeida, D. Gomes de Souza, A. Martimbiano de Assis

T09-05B

A new *in vitro* model of focal ischemia: towards the understanding of re-oxygenation specific damage in the white matter

A. O. Rosa, R. Fern

T09-06B

Differential effects of intranasal epidermal growth factor treatment on the subventricular zone and dentate gyrus after chronic perinatal hypoxia

J. Scafidi, J. Edwards, V. Gallo

T09-07B

Protein profiling in penumbra after local photo-thrombotic infarction in the rat cerebral cortex

A. Uzdenksy, S. Demyanenko

T09-08B

Antihypoxic properties of Glial cell line-derived neurotrophic factor (GDNF) in the acute normobaric hypoxia *in vitro*

M. Vedunova, T. Mishchenko, E. Mitroshina, T. Shishkina, T. Astrakhanova, I. Mukhina

T09-09B

Chronic stress exacerbates neuronal loss associated with secondary neurodegeneration and suppresses microglial-like cells following focal motor cortex ischemia in the mouse

F.R. Walker, I. Zouikr, M. Patience, A. Clarkson, J. Isgaard, S. Johnson, N. Spratt, M. Nilsson

T09-10B

Rapid microglial actions contribute to excitotoxic responses and brain injury after cerebral ischemia

B. Martinecz, G. Szalay, N. Lénárt, E. Csaszar, B. Rózsa, A. Denes

T10 MYELIN

T10-01B

A key role of the androgen receptor in the sexual dimorphism of myelin

C. Abi Ghanem, C. Degerny, M. Schumacher, A. Ghoumari

T10-02B

Axon path and peripheral nerve structure is altered in the trembler-J mouse model of Charcot Marie Tooth disease

L. Alvey, J. Jones, M. Pickering

T10-03B

Demonstration of pyruvate carboxylaxion, pentose phosphate pathway, and mitochondrial activity in cultured oligodendrocytes using ¹³C-labelled isotopes

A. Amaral, M. Ghezu Hadera, M. Kotter, U. Sonnewald

T10-04B

Development of transgenic tools to decipher the role of SOX17 in remyelination

K. Benardais, M. Fauveau, C. Kernion, B. Nait-Oumesmar

T10-05B

Modulation of endocannabinoid signalling and therapeutic effects of MAGL and ABHD6 blockade in the cuprizone model of primary demyelination

A. Bernal Chico, A. Manterola, K.-L. Hsu, B. Cravatt, C. Matute, S. Mato

T10-06B**The history of myelin**A. Boullerne

T10-07B**A novel role for Endothelin receptor B signalling in the peripheral nervous system**B. G. Brinkmann, S. Quintes, M. Ebert, N. Keric, A. Matz, H. Ehrenreich, K.-A. Nave, M. W. Sereda

T10-09B**Molecular analysis of the axon initial segment in a cuprizone-induced demyelination model of Multiple Sclerosis**A. Dilsizoglu Senol, M. J. Hossain, V. Guillemot, D. Theodorou, C. Lubetzki, M. Davenne

T10-10B**The oligodendrocyte “processosome”: identification of new regulators of differentiation and myelination**H. S. Domingues, A. Cruz, F. Boucanova, M. M. Azevedo, A. I. Seixas, S. O. Braz, J. Relvas

T10-11B**Lanthionine ketimine ester provides benefit in a mouse model of multiple sclerosis**D. Feinstein, J. Dupree, K. Hensley

T10-12B**Gas6/TAM signalling promotes oligodendrocyte differentiation, maturation, and remyelination after toxic injury in culture**S. Goudarzi, A. Butt, S. Hafizi

T10-13B**The nootropic agent nefiracetam enhances myelin repair**E. A. Keogh, S. D. O'Shea, R. P. Murphy, M. Pickering, K. J. Murphy

T10-14B**CNS-pericytes promote oligodendrocyte fate decision and differentiation contributing to myelin development and repair**S. Lange, A. Guzman De La Fuente, P. Rotheneichner, P. van Wijngaarden, G. A. Gonzalez, H. Tempfer, A. Trost, C. Zhao, S. Couillard-Despres, J. Andrae, C. Betsholtz, R. J. M. Franklin, L. Aigner, F. J. Rivera

T10-15B

In vivo and in vitro evaluation of MAGL and ABHD6 as novel therapeutic targets in multiple sclerosis

A. Manterola, A. Bernal-Chico, M. Canedo, M. Sánchez-Gómez, R. Rodríguez-Puertas, K.-L. Hsu, B. Cravatt, C. Matute, S. Mato

T10-16B

An Egr2 long antisense-RNA regulates peripheral myelination

M. Martinez Moreno, A. Olaru, J. Ness, N. Tapinos

T10-17B

De novo synthesis of fatty acids in oligodendrocytes is critical for CNS myelination

L. Montani, P. Dimas, A. L. Dätwiler, D. Moreno, M. Trötzmüller, H. C. Köfeler, C. F. Semenkovich, U. Suter

T10-18B

Nefiracetam is ineffective in reversing myelin damage in the trembler-J model of Charcot Marie Tooth disease

R. Murphy, L. Alvey, J. Jones, K. Murphy, M. Pickering

T10-19B

Non-coding RNAs in the differentiation of oligodendrocyte precursor cells

S. Samudiyata, S. Marques, D. Vanichkina, G. Castelo-Branco

T10-20B

Proper myelin maturation during postnatal development depends on Apolipoprotein D function

N. García-Mateo, C. Lillo, M. A. Gijón, R. Murphy, D. Sanchez, M. Ganfornina

T10-21B

Regulatory role of the thrombin receptor in myelination

H. Yoon, M. Radulovic, K. Drucker, I. Scarisbrick

T10-22B

Aquaporin 1 is localized in the Schmidt-Lanterman incisures and at the paranodes of the nodes of Ranvier in the rat sciatic nerve

E. Segura-Anaya, A. Martínez-Gómez, M. Dent

T10-24B

The role of endothelin signalling in myelination

M. Swire, D. Lyons, C. ffrench-Constant

T10-25B

The role of fibroblast growth factor 9 in multiple sclerosis: inhibition of myelination and induction of pro-inflammatory environment

K. Thuemmler, M. Lindner, C. Stadelmann, H. Lassmann, N. Schaeren-Wiemers, E. Meinl, C. Linington

T10-26B

L-PGDS/GPR44: new regulators of Peripheral Nervous System myelination

A. Trimarco, M. G. Forese, P. Brambilla, G. Dina, D. Pieragostino, F. Martinelli Boneschi, A. Quattrini, C. Taveggia

T10-27B

CNS myelin and axon morphology in demyelination and dysmyelination in mouse models

S. Yoshida, Y. Bando

T11 NEURAL STEM/PROGENITOR CELLS

T11-01B

DNA methylation in ageing adult oligodendrocyte progenitor cells

R. Baror, D. Ma, S. Dietmann, M. Paramor, R. Franklin J M

T11-02B

The impact of TNF α on the developing brain

A. Breton, H. Stolp, L. Ferrara, L. Lundberg, I. Sá-Pereira, B. Finsen, B. Clausen, K. Lambertsen, D. Anthony

T11-03B

Study of the capability of endogenous neural stem cells to protect from glutamatergic excitotoxicity by sensing danger signals

E. Butti, D. De Feo, E. Brambilla, M. Bacigaluppi, I. Zanoni, F. Granucci, G. Martino

T11-04B

Enteric Glia: S100b, GFAP and beyond

D. Grundmann, D. Simon, F. Markwart, A. Scheller, F. Kirchhoff, K.-H. Schäfer

T11-05B

Molecular and cellular characterization of the dormant and injury-activated mouse and human spinal cord stem cell niches

J.- P. Hugnot, D. Mamaeva, C. Ripoll, L. Bauchet, F. Perrin, H. Noristani, V. Rigau, B. Rothhut

T11-06B

Mining the sorting machinery of extracellular miRNAs in neural stem/precursor cells

N. Iraci, T. Leonardi, A. Enright, S. Pluchino

T11-07B

Mesenchymal stem cell-secreted factors prevent p57^{kip2} nuclear translocation in neural stem/progenitor cells: role in oligodendroglial fate decision?

J. Jadasz, J. Domke, L.- S. Spitzhorn, R. Orefeo, H.- P. Hartung, J. Adjaye, P. Küry

T11-09B

Neural stem cell therapy for spinal cord injury

C. López, A. Torres, J. Hernández, X. Navarro, M. Edel

T11-10B

Neuroinflammation influences the viability, distribution and therapeutic efficacy of transplanted neural stem cells in a mouse model of multiple sclerosis

A. Merlini, D. De Feo, F. Ruffini, A. Finardi, G. Comi, G. Martino

T11-11B

Neurogenesis and lateral ventricular extension in the adult guinea pig brain

F. Nualart, N. Jara, M. Cifuentes, K. Salazar, F. Martinez

T11-12B

Myelinating oligodendrocytes generated by direct cell reprogramming from adult rat adipose tissue

C. L. Paíño, M. P. Muñoz, L. C. Barrio, D. González-Nieto, L. Yellosillo

T11-13B

Fate potential and clonal analysis of neural progenitors in distinct germinal niches of the postnatal cerebellum

E. Parmigiani, K. Leto, C. Rolando, A. Buffo, F. Rossi

T11-14B

Low density lipoprotein receptor-related protein 1 (LRP1)—a novel modulator of neural stem cells' properties in the developing cortex and spinal cord

D. Safina, R. Romeo, F. Schlitt, F. Edenhofer, A. Faissner

T11-15B

Characterization of neural stem cell-derived reactive astrocytes in LPAR1-EGFP mice

R. Valcárcel-Martín, S. Martín-Suárez, J. M. Encinas

T11-16B

Efficient derivation of myelinating oligodendrocytes from NKX2.1-GFP human embryonic stem cell reporter line

M. Kim, J. Y. Lee, E. Stanley, A. Elefantiy, S. Petratos

T12 NEUROIMMUNOLOGY AND NEUROINFLAMMATION

T12-01B

Role of glial cells in the neuroinflammatory damage induced by ethanol through TLRs/NLRs receptors

S. Alfonso-Loeches, J. Ureña-Peralta, M. Morillo-Bargues, J. Oliver-de la Cruz, U. Gómez-Pinedo, C. Guerri

T12-02B

Neuropeptide Y Y₁ receptor modulates microglia activation in the rat retina

A. Ambrósio, F. Elvas, M. H. Madeira, T. Martins, C. Cavadas, A. R. Santiago

T12-03B

Differential inflammasome expression and activation in glial cells

A. Gustin, M. Kirchmeyer, E. Koncina, P. Felten, P. Heuschling, C. Dostert

T12-04B

IL4 exposure broadly represses TLR-induced cytokine responses in primary microglia

C. van der Putten, E. Zuiderwijk-Sick, J. Veth, S. Burm, E. Pasini, H. Kuipers, M. van Eggermond, L. van Straalen, I. Kondova, P. van der Valk, P. van den Elsen, S. Amor, J. Bajramovic

T12-05B

Phagocytic gliapses precede cellular elimination leading to targeted phagoptosis in the brain

E. Saavedra, P. Casanova, C. Barcia

T12-06B

Antibody and complement-mediated glial response and demyelination

C. Berg, R. Khorrooshi, N. Asgari, C. Linington, P. B. Morgan, T. Owens

T12-07B

Intracerebroventricular insulin presents different neuroinflammatory effects in young and aged hippocampus of Wistar rats

C. Branco Haas, A. Kopczynski de Carvalho, A. Pastoris Müller, L. V. Cruz Portela

T12-08B

Inflammasome-induced IL-1 β secretion in microglia is characterized by delayed kinetics and is only partially dependent on inflammatory caspases

S. Burm, E. Zuiderwijk-Sick, A. 't Jong, C. van der Putten, J. Veth, I. Kondova, J. Bajramovic

T12-09B

Astrocytes as a key partner in Methamphetamine-induced Microglia activation

T. Canedo, C. C. Portugal, R. Socodato, J. Relvas, T. Summavieille

T12-10B

Microglial Microvescicles as therapeutic vector for neuroinflammation

G. Casella, F. Colombo, R. Furlan

T12-12B

Influence of the anti-epileptic drug lacosamide (LCM) on glial properties in astrocyte/microglia co-cultures

H. Dambach, Z. Moinfar, F. Corvace, E. Förster, P. M. Faustmann

T12-13B

In mice retina contralateral to experimental glaucoma increased microglial cell number and retraction of microglial processes occurs beyond the GCL

R. de Hoz, A. I. Ramirez, B. I. Gallego, B. Rojas, J. J. Salazar, F. J. Valiente-Soriano, M. Aviles-Trigueros, M. P. Villegas-Perez, M. Vidal-Sanz, A. Triviño, J. M. Ramirez

T12-14B**Inflammasome expression in demyelinated CNS lesions**S. Fleville, M. Dittmer, D. Fitzgerald, Y. Dombrowski

T12-15B**Temporal gene expression profile related to microglia reactivity in 3xTgAD mice**A. Fernandes, C. Caldeira, A. S. Falcão, C. Cunha, A. R. Vaz, D. Brites

T12-16B**Microglial Wnt signaling inhibition promotes microglia activation and oligodendrocyte maturation blockade**B. Fleiss, J. Van Steenwinckel, A. L. Schang, S. Sigaut, M. Krishnan, A. Montamé, V. Degos, O. Hennebert, S. Lebon, L. Schwendimann, T. Le Charpentier, A. D. Edwards, H. Hagberg, N. Soussi-Yanicostas, P. Gressens

T12-17B**Astrocytes overexpressing transforming growth factor beta1 show increase uptake and degradation of beta amyloid**S. Amram, D. Frenkel

T12-18B**A statistical physics-based spatial analysis in APP/PS1 mice reveals that astrocytes do not migrate to amyloid-beta plaques**E. Galea, W. Morrison, E. Hudry, M. Arbel-Ornath, B. J. Bacskai, T. Gómez-Isla, H. E. Stanley, B. T. Hyman

T12-19B**Role of Tumor Necrosis Factor Receptor 2 signaling in microglia and macrophages in experimental autoimmune encephalomyelitis**H. Gao, P. M. Madsen, R. Brambilla

T12-20B**Synaptophysin is a suitable marker to study axonal transport damage during experimentally induced demyelination**V. Gudi, L. Gai, L. Salinas Tejedor, V. Herder, W. Baumgärtner, M. Stangel, T. Skripuletz

T12-21B**CNS endothelial IL-1 signaling drives neuroinflammation**

J. Hauptmann, T. Regen, A. Waismann

T12-22B

Intrahippocampal clodronate administration alters the brain inflammatory response to systemic LPS in mice
C. Lacabanne, J. Kim, A. Benmamar-Badel, S. Layé, G. Luheshi

T12-23B

The role of mTOR kinase in glioma-activated rat microglia and in human glioma

E. Laudati, C. Dello Russo, P. Navarra, L. Lisi

T12-24B

Oligodendroglial TNFR2 mediates transmembrane TNF-dependent repair in experimental autoimmune encephalomyelitis by promoting oligodendrocyte differentiation

P. Madsen, D. Motti, D. Szymkowski, K. Lambertsen, J. Bethea, R. Brambilla

T12-25B

Liver X receptor activation in MS lesions

J. Mailleux, T. Vanmierlo, J. Bogie, E. Wouters, P. Stinissen, J. Hendriks, J. van Horssen

T12-26B

Multiple Sclerosis: studying lipocalin 2 as a novel player in the pathophysiology of the disease

S. Neves, S. Mesquita, C. Ferreira, J. Sousa, J. Cerqueira, N. Sousa, M. Correia-Neves, J. Palha, F. Marques

T12-27B

The effect of microglia on progenitor cells during tuberal hypothalamic development

C. Marsters, Q. Pittman, D. Kurrasch

T12-28B

A novel imaging approach to monitor multiple sclerosis

M. Domercq, A. Martin, N. Vázquez-Villoldo, D. Padro, V. Gómez-Vallejo, F. Soria, B. Szczupak, S. Plaza, A. Arrieta, T. Reese, J. Llop, C. Matute

T12-29B

Elucidating the roles of FGF signaling in Multiple Sclerosis

D. McElroy, K. Thuemmler, M. Lindner, C. Schuh, H. Lassman, C. Linington

T12-30B

Probenecid application prevents clinical symptoms and T cell infiltration in a mouse model of experimental autoimmune encephalomyelitis

N. Hainz, S. Semar, T. Tschernig, C. Meier

T12-31B

Microglia—the radio-resistant immune cell of the brain

F. Menzel, K. Immig, F. Merz, I. Bechmann

T12-32B

Glial changes in psychiatric disorders; towards isolating glia from the post-mortem human brain

M. Mizee, K. Schuurman, J. Hamann, I. Huitinga

T12-33B

Inflammatory response caused by GFAP mutations in Alexander disease

M. Olabarria, M. Putilina, J. E. Goldman

T12-34B

CD163+ Macrophages in human ischemic stroke

J. Pedragosa, X. Urra, F. Miró, E. Gelpí, A. Chamorro, A. M. Planas

T12-35B

Sonic hedgehog and vitamin D modulation of metalloproteinase expression and *in vitro* endothelial junction integrity

I. Pla-Navarro, D. Bevan, M. Mogensen, M. Hajihosseini, M. Lee, J. Gavrilovic

T12-36B

The Sodium Vitamin C co-Transporter-2 (SVCT2): a key molecule for microglia physiology

C. C. Portugal, R. Socodato, T. Canedo, C. Silva, T. Martins, V. Coreixas, E. C. Loiola, B. Gess, D. Röhr, A. R. Santiago, P. Young, R. Paes-de-Carvalho, A. Ambrósio, J. Relvas

T12-37B

Is microglial C/EBP β deficiency neuroprotective in EAE? A new mouse model to study its implications *in vitro* and *in vivo*

M. Pulido-Salgado, J. Vidal-Taboada, A. G. García-Díaz Barriga, J. Serratosa, T. Valente, P. Castillo, J. Matalonga, M. Straccia, J. M. Canals, C. Solà, J. Saura

T12-38B

Glial activation is associated with l-DOPA induced dyskinesia and blocked by a nitric oxide synthase inhibitor in a rat model of Parkinson's disease

R. Raisman-Vozari, M. Bortolanza, R. Cavalcanti-Kiwiatkoski, F. E. Padovan-Neto, C. da-Silva, M. Mitkovski, E. Del-Bel

T12-39B

The effects of systemic infection on neuroinflammation in Alzheimer's disease

S. Rakic, Y. M. A. Hung, J. Wild, J. Nicoll, S. Love, C. Holmes, V. H. Perry, W. Stewart, D. Boche

T12-40B

Microglial activation beyond the ganglion-cell layer in contralateral retina to experimental unilateral ocular hypertension

A.I. Ramirez, B. I. Gallego, J. J. Salazar, B. Rojas, R. de Hoz, F.J. Valiente-Soriano, M. Aviles-Trigueros, M. P. Villegas-Perez, M. Vidal-Sanz, A. Triviño, J. M. Ramirez

T12-41B

Astrocyte-targeted IL10 production modifies expression of TREM2 and CD200R in activated microglia after perforant pathway transection

M. Recasens Torné, K. Shrivastava, B. Almolda, I. Campbell, B. Gonzàlez, B. Castellano

T12-42B

Pathologic T cell cytokines have both beneficial and deleterious effects on oligodendrocyte lineage cells

A. Robinson, J. Rodgers, S. Miller

T12-43B

Diazoxide attenuates neuroinflammation and enhances neurogenesis after NMDA-induced excitotoxicity in the rat hippocampus

M. Martinez-Moreno, M. Batlle, F.J. Ortega, J. M. Vidal-Taboada, J. Gimeno-Bayon, C. Andrade, N. Mahy, M.J. Rodriguez

T12-44B

Microglial activation is detected in mice retina contralateral to experimental glaucoma but rod-like microglia is restricted to eyes with ocular hypertension

B. Rojas, B. I. Gallego, R. de Hoz, A. I. Ramirez, J. J. Salazar, F.J. Valiente-Soriano, M. Aviles-Trigueros, M. Vidal-Sanz, M. P. Villegas-Perez, A. Triviño, J. M. Ramirez

T12-45B

Structure-activity of neurostatin and other O-acetylated gangliosides as anti-inflammatory drugs on microglial cells

L. Romero-Ramirez, N. Yanguas-Casás, A. Martínez-Vázquez, M. de la Barreda Manso, M. Gilbert, M. Nieto-Sampedro

T12-46B

The role of microglia and inflammation in an animal model of ALS

C. Rossi, A. Bergamaschi, R. Furlan, N. Riva, A. Quattrini, G. Comi, G. Martino, L. Muzio

T12-47B

Immune system changes after adult brain injury define scar formation

R. Sanchez Gonzalez, M. Irmler, J. Beckers, M. Götz, J. Ninkovic

T12-48B

Multiple sclerosis patient's lymphocytes crosstalk with microglial cells impacts the remyelination process

C. Sanson, M. El Behi, C. Bachelin, L. Guillot-Noel, N. Sarrazin, B. Stankoff, I. Rebeix, B. Fontaine, V. Zujovic

T12-49B

An age-specific intravascular macrophage population is associated with the murine window of susceptibility to CNS inflammation

I. Sá-Pereira, J. Roodsealaar, D. C. Anthony, H. B. Stolp

T12-50B

Characterization of the Wnt signalling pathway in the hippocampus of mice with experimental autoimmune encephalomyelitis

R. Schneider, B. Koop, F. Schröter, J. Ingwersen, H.-P. Hartung, O. Aktas, T. Prozorovski

T12-51B

Non-lytic autoantibody mediated injury induces chemokine expression in myelinating cultures

T. Semenoff, K. Chapple, K. Thuemmler, J. Edgar, C. Linington

T12-52B

Doxycycline decreases the inflammatory response of LPS-treated microglial cells

J. E. Sepulveda Diaz, F. V. Santa Cecilia, S. B. Socias, M. O. Ouidja, E. Del-Bel, P. P. Michel, T. M. Cunha, R. Raisman-Vozari

T12-54B

Fibronectin aggregates maintain a mixed activation phenotype of microglia and macrophages that impairs differentiation of oligodendrocytes

E. Sikkema, J. Stoffels, F. Basedow, W. Baron, D. Hoekstra

T12-55B

Prenatal stress causes prolonged microglial activation and enhanced inflammatory processes in the rat brain

J. Slusarczyk, E. Trojan, K. Glombik, J. Mika, A. Basta-Kaim

T12-56B

Can embryonic microglia bridge the gap between maternal immune activation and neuropsychiatric disorders?

S. Smolders, N. Swinnen, S. Smolders, P. Legendre, J.-M. Rigo, B. Brône

T12-57B

Specific downregulation of RhoA triggers microglia pro-inflammatory signature via Rock2/Csk/c-Src signaling pathway

R. Socodato, C. C. Portugal, T. Martins, T. Canedo, C. Silva, I. Domith, N. Oliveira, A. R. Santiago, R. Paes-de-Carvalho, A. Ambrósio, J. Relvas

T12-58B

Modulation of neuroinflammation by the microglial inhibitory receptor CD200R1

T. Valente, G. Dentesano, J. Serratosa, M. Pulido-Salgado, N. Rabaneda, J. Saura, C. Solà

T12-59B

Anti-inflammatory therapy via CD163-macrophages in the 6-OHDA Parkinson's disease model

N. Tentillier, M. Olesen, A. Etzerodt, S. Moestrup, M. Romero-Ramos

T12-60B

Anti-VLA-4 treatment reduces microglial activation in a focal EAE-model

S. Vainio, A. M. Dickens, J. Tuisku, O. Eskola, O. Solin, D. Anthony, M. Haaparanta-Solin, J. Rinne, L. Airas

T12-61B

CD200-CD200R1 system in multiple sclerosis

T. Valente, J. Serratosa, U. Perpiñá, J. Saura, C. Solà

T12-62B

Liver X receptor beta deficiency decreases neuroinflammation in an animal model of multiple sclerosis

J. Vanmol, T. Vanmierlo, J. Bogie, S. Timmermans, K. Nelissen, K. Wouters, H. de Vries, J.-A. Gustafsson, K. Steffensen, P. Stinissen, N. Hellings, J. Hendriks

T12-63B

Induction of microglia M2 polarization in male and female mice and in response to estrogens using icv injection of IL4

E. Vegeto, A. M. Villa, G. Pepe, A. Maggi

T12-64B

Differential expression of TREM2 in transgenic mice with CNS-targeted IL-6 or IL-10 production correlates with opposing effects on neurodegeneration after facial nerve axotomy

N. Villacampa, B. Almolda, I. L. Campbell, B. González, B. Castellano

T12-65B

Multiplexed synchrotron X-Ray fluorescence imaging of brain inflammation using targeted heavy metal nanoparticles

K. Wals, D. C. Anthony, B. G. Davis

T12-66B

Interleukin-33 is synthesized in response to the CNS injury to affect the response of microglia and macrophages

B. Wylot, K. Konarzewska, M. Zawadzka

T12-67B

Characterization of the cytokine secretion profile of highly purified, activated astrocytes

H. Zhang, S. Reiß, M. Jungblut, A. Bosio

T12-68B

The role of CC chemokine ligand 3 (CCL3) in a mouse diabetic neuropathy—in vivo and in vitro studies

M. Zychowska, E. Rojewska, A. Piotrowska, D. Pilat, J. Mika

T12-69B

β -amyloid plaque-associated microglia priming in transgenic mouse models of Alzheimer's disease

Z. Yin, D. Raj, N. Saiepour, D. Van Dam, N. Brouwer, B. Eggen, U.-K. Hanisch, E. Hol, W. Kamphuis, T. Bayer, P. De Deyn, E. Boddeke

T12-70B

Mechanisms of satellite glia-dependent spinal cord microglia activation in nerve injury-induced neuropathic pain

S.J. Lee, H. Lim, H. Lee

T13 NEUROVASCULAR INTERACTIONS

T13-01B

Rapid tonicity induced re-localisation of endogenous aquaporin 4 in primary rat astrocytes—a therapeutic target for cytotoxic brain oedema?

R. Day, P. Kitchen, M. Salman, R. Bill, A. Conner, M. Conner

T13-02B

Antidepressants increase expression of the trophic factor GDF15 in astrocytes and enhance their plasticity at the glia-vasculature interface

V. Malik, J. Klaus, S. Rajarathinam, I. Neumann, R. Rupprecht, B. Di Benedetto

T13-03B

Volume dynamics of astroglial endfeet during cortical spreading depression

D. B. Dukefoss, B. Rosic, V. Jensen, A. Thoren, R. Enger, E. A. Nagelhus

T13-04B

Activity-dependent dendritic release of neuropeptides regulates neurovascular coupling in the hypothalamic supraoptic nucleus.ΔΔ

W. Du, J. Stern, J. Filosa

T13-05B

Aquaporin 4 is involved in brain edema and blood-brain barrier disruption induced by methamphetamine

R. Leitão, C. A. Fontes-Ribeiro, A. P. Silva

T13-06B

Mechanosensitive Piezo2 channels are functionally expressed in retinal astrocytes: implications for blood flow autoregulation

M. McGahon, A. O'Neill, G. McGeown, T. Curtis

T14 REGENERATION AND REPAIR

T14-01B

PDGFR α -positive progenitor cells form myelinating oligodendrocytes and Schwann cells following contusion spinal cord injury

P. Assinck, G.J. Duncan, J.R. Piemel, M.J. Lee, J. Liu, D.E. Bergles, W. Tetzlaff

T14-02B

Human olfactory derived mesenchymal stem cell transplantation as a candidate for CNS repair

S. Lindsay, A. Toft, S. Johnstone, J. Griffin, J. Riddell, S. Barnett

T14-03B

Dual effect of salubrinal after a cortical stab wound injury in mice

M.A. Barreda-Manso, N. Yanguas-Casás, M. Nieto-Sampedro, L. Romero-Ramírez

T14-04B

STAT3 is required for the long-term maintenance of the repair Schwann cell phenotype in injured nerves

C. Benito Sastre, C.M. Davis, R. Mirsky, K.R. Jessen

T14-05B

Control of Oligodendrocyte Precursor Cell function by their microenvironment

E. Borger, T. Carr, A. Williams

T14-06B

Essential role of endogenous fatty acid synthesis in CNS myelin regeneration

P. Dimas, L. Montani, J.A. Pereira, C.F. Semenkovich, U. Suter

T14-07B

A co-culture system to study interactions between sympathetic neurons and glial progenitors

J. Dore, L. Patriarca, J. Volpe, A. McNally, J. Spinney

T14-08B

Schwann cell dynamics and function during peripheral nerve regeneration

M. Ducommun, M. Granato

T14-09B

Human Schwann-like adipose-derived stem cells combined with synthetic biodegradable polymer scaffolds for nerve regeneration

A. Faroni, A. Mobasseri, J. Gough, G. Terenghi, A. Reid

T14-10B

Schwann cells in the proximal stump of injured nerves activate c-Jun to control the intrinsic growth state and regeneration potential of DRG sensory neurons

S. Fazal, K. Bartus, M. Iberl, D. Wilton, E. J. Bradbury, R. Mirsky, K. R. Jessen

T14-11B

Bridging the gap in spinal cord injury using novel super-macroporous polymer scaffolds

S. Hosseinzadeh, D. Wellings, M. Riehle, S. Barnett

T14-12B

The role of GSK3 β in regulating astrogliosis

A. Kalam, A. Rivera, A. Didangelos, E. Bradbury, A. Butt

T14-13B

Daam2-PIP5K is a novel regulatory pathway for Wnt signaling and therapeutic target for remyelination in the CNS

H. K. Lee, L. S. Chaboub, W. Zhu, D. Zollinger , M. N. Rasband , S. P. Fancy , B. Deneen

T14-15B

Deciphering mechanisms by which olesoxime promotes oligodendrocyte maturation and remyelination

K. Magalon, J. Tracz, M. Le Grand, M. Moulis, P. Belenguer, M. Carre, P. Durbec

T14-16B

Clonal oligodendrocyte progenitor cell dynamics in spinal cord remyelination

C. McClain, R. Franklin, B. Simons

T14-17B

Microglial changes at the base of a diminished regenerative potential in the aged zebrafish retina

L. Moons, I. Bollaerts, J. Van houcke, A. Beckers, K. Lemmens, I. Van Hove, L. De Groef

T14-18B

Transduction of an immortalized olfactory ensheathing glia line with the green fluorescent protein (GFP) gene: evaluation of its neuroregenerative capacity

N. Plaza, J. Sierra, M. T. Moreno Flores

T14-19B

The role of Hippo/YAP signalling in Schwann cell development and peripheral nerve repair

K. North, T. Mindos, X.- P. Dun, D. Parkinson

T14-20B

Intralesional transplantation of mesenchymal stem cells in the toxic demyelinating cuprizone model

L. Salinas Tejedor, K. Jacobsen, G. Berner, V. Gudi, N. Jungwirth, F. Hansmann, W. Baumgärtner, T. Skripuletz, M. Stangel

T14-22B

The P2X7 receptor is involved in normal re-myelination following sciatic nerve injury

R. Smith, A. Faroni, S. Martin, P. Procacci, V. Conte, E. Puccianti, L. Castelnovo, A. Reid, V. Magnaghi, A. Verkhratsky

T14-23B

Olfactory ensheathing cells overexpressing prostacyclin synthase improves functional restoration after transplantation to transected rat spinal cord

M.-J. Tsai, C.-T. Huang, C.-F. Weng, D.-Y. Liou, S.-K. Shyue, Y.-S. Huang, H. Cheng

T14-24B

RNA nanoparticles for targeted delivery of siRNAs against reactive astroglial cells—an *in vitro* study

J. Verheyen, J. Smith, S. Basilico, P. Guo, S. Pluchino

T14-25B

Astrocytes enhance the dopaminergic differentiation of stem cells and promote brain repair through bFGF

F. Yang, Y. Liu, J. Tu, L. Wang

T14-26B

Increasing AMPA signalling to improve myelin repair

K. Volbracht, M. Kovács, A. Denizot, H. Gautier, R. T. Káradóttir

T14-27B

Transcriptional regulation of AMPA-type glutamate receptors in the oligodendrocyte lineage

G. Begum, U. Ahmed, A. Stevens, D. Fulton

T15 TRANSMITTER RECEPTORS, ION CHANNELS AND GAP JUNCTIONS**T15-01B**

Short-term modulation of astrocyte plasma membrane extensions by GPCRs

M. Chisari, A. Scuderi, M. A. Sortino

T15-02B

Unravelling the mechanisms causing astrocytic uncoupling in the epileptic hippocampus

T. Deshpande, P. Bedner, C. Steinhäuser

T15-03B

Inducible astrocyte specific Kir4.1 knockout mice exhibit a blunted ventilatory response to CO₂

V. Hawkins, D. Mulkey

T15-04B

Subcellular distribution and trafficking of astroglial receptors monitored with super-resolution microscopy

J. Heller, D. Rusakov

T15-05B

Glutamine synthetase stability is regulated by g-aminobutyric type B receptors

D. Huyghe, M. Terunuma, M. Pangalos, S. Moss

T15-06B

Functional expression of GABA_A in astrocytes from neostriatum

D. Reyes-Haro, E. Mora-Loyola, M. L. Martínez-Mendoza, A. Martínez-Torres

T15-07B

Astrocyte swelling in response to neural activation: role of cotransporters

K. Rothenfusser, D. Boss, P. Jourdain, P. Magistretti, P. Marquet

T15-08B

Astrocytic pH-regulation in cell culture of mice

A. Seidinger, A. Weise

T15-09B

Molecular mechanisms underlying nodal protein assembly prior to myelination in the CNS

N. Sol-Foulon, S. Freeman, A. Desmazières, C. Lubetzki

T15-10B

Mechanosensitive ion channel, Piezo1, is expressed in myelinated regions of the rat brain

M. Velasco, G. Sheridan

T15-11B

The role of L-type calcium channels subtypes Cav1.2 and Cav1.3 in NG2 glia

N. Zhao, F. Kirchhoff, W. Huang, A. Scheller

T15-12B

Anatomical analysis of mutant mice expressing type-I cannabinoid receptors in astrocytes of the hippocampus

A. Gutierrez, N. Puente, G. Marsicano, P. Grandes

T15-13B

Generation of conditional knockout mouse lines for opioid receptors in microglia

H. Maurin, L.-A. Roeckel, D. Reiss, C. Gaveriaux-Ruff

T16 TROPHIC FACTORS

T16-01B

Neuroprotection and reduction of astroglial reaction by human embryonic stem cell engrafting following spinal cord ventral root avulsion

M. Araujo, A. Speijo, R. Ferreira Jr, B. Barraviera, S. Kyrylenko, A. Oliveira

T16-02B

Age related loss of oligodendrocyte metabolic support

T. Philips, E. Hughes, B. Morrison, Y. Lee, R. Sattler, D. Bergles, J. Rothstein

T17 TUMOURS

T17-01B

Diffuse low grade gliomas: characterization and development of *in vitro* model for designing innovative therapeutic approaches

S. Azar, A. Genentier, F. Lorcy, V. Rigau, H. Duffau, B. Rothhut, J. P. Hugnot

T17-02B

Aquaporin 4 related orthogonal arrays of particles undergo drastic changes in pathological conditions like Astrocytomas WHO-Grade II to IV

P. Fallier-Becker, M. Hoffmeister, S. Mitrovic, S. Noell

T17-03B

Molecular mechanisms of Notch1-induced pericyte-like transdifferentiation of glioblastoma stem cells

S. Guelfi, P.-O. Guichet, M. Teigell, L. Hoppe, N. Bakalara, L. Bauchet, H. Duffau, K. Lamszus, B. Rothhut, J.-P. Hugnot

T17-04B

Role of the RNA-binding protein HuR in neurofibromas and malignant peripheral nerve sheath tumour

M. Palomo, M. Iruarrizaga-Lejarreta, M. Varela-Rey, A. Woodhoo

T17-05B

Human monocyte-derived macrophages exposed to glioblastoma cells and tumor-associated microglia/macrophages differ in glutamatergic gene expressions

J. Choi, B. Stradmann-Bellinghausen, N. Savaskan, A. Regnier-Vigouroux

T17-06B

Transport of branched-chain ketoacids is mediated by monocarboxylate transporters in brain tumor cells

L. Silva, H. Becker, N. Kneisel, G. Poschet, I. Helbing, P. Lichter, R. Hell, B. Radlwimmer

T17-07B

Identification of a gene mutated in 7.5% of anaplastic oligodendrogiomas

I. Simeonova, K. Labreche, A. Kamoun, V. Gleize, D. Chubb, E. Letouzé, Y. Riazalhosseini, S. Dobbins, N. Elarouci, F. Ducray, A. de Reyniès, D. Zelenika, C. Wardell, M. Frampton, O. Saulnier, T. Pastinen, S. Hallout, D. Figarella-Branger, C. Dehais, A. Idbaih, K. Mokhtari, J.-Y. Delattre, E. Huillard, M. Lathrop, M. Sanson, R. Houlston

T17-08B

EGFR expression confers stem cell-like properties to human SVZ progenitors and gliomas

J. Tome Garcia, P. Erfani, P. Canoll, F. Doetsch, N. Tsankova

Neuroscience Research Related Cytokine Products

This informative booklet features a comprehensive collection of cytokine products relevant to your neuroscience research.

Program at a Glance

		POSTER PRESENTATION		SCHEDULE						
		Tuesday, July 14		Wednesday, July 15		Thursday, July 16				
						Friday, July 17				
						Saturday, July 18				
09:00–10:00	Introductory Course	p.20	Workshops	p.21	Plenary Lecture P-02	p.26	Plenary Lecture P-04	p.32	Plenary Lecture P-06	p.38
10:15					Symposia II S06–10	p.26	Symposia IV S16–20	p.32	Symposia VI S26–30	p.38
12:15–13:00					Lunch Break		Lunch Break		Lunch Break	
13:15					Poster Session I	p.44	Poster Session II	p.86	Poster Session II	p.86
14:00										
15:15					Opening Plenary Lecture P-01	p.22			Plenary Lecture P-07	p.40
16:00					Symposia I S01–05	p.22	Symposia III S11–15	p.28	Symposia V S21–25	p.35
17:15										
17:30–18:30					Poster Session I	p.44	Plenary Lecture P-03	p.30	Plenary Lecture P-05	p.37
19:15–20:15									Informal Get-Together with Drinks	

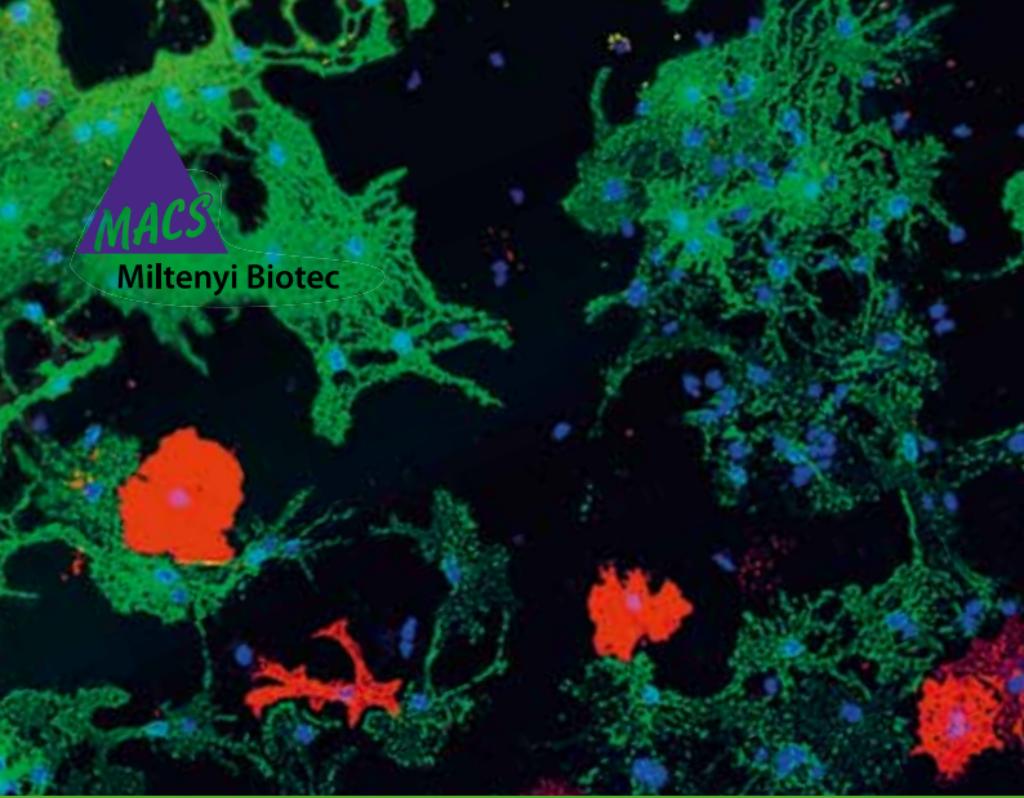

Call for Symposia

XIII European Meeting on
Glial Cells in Health and Disease
Edinburgh | July 8–11, 2017

Deadline for symposia proposals:
March 28, 2016

www.gliameeting.eu

A fluorescence micrograph showing green-stained microglia cells and red-stained nuclei. A purple triangle in the top left corner contains the text "MACS" and "Miltenyi Biotec".

MACS

Miltenyi Biotec

Pure microglia in half a day

We make it happen

- **Save time with optimized tissue dissociation kits and detailed protocols**
- **Everything you need to know about microglia isolation**
- **Gain reproducible results fast**

Check out our video using the code or URL
